PROJECT INFORMATION

Details

Application Received Date:	3-22-2011 (Application for Amendment received 7-20-11)
Application Completed Date:	4-20-2011 (Application deemed complete on 8-17-11)
Additional Info Completed Date:	
Applicant:	California Department of Fish and Game
Applicant Representative(s):	Karen Carpio
Project Title:	The 2011 Fisheries Restoration Grant Program
Regulating Water Board:	SB - State Water Board
Type of Project:	Habitat Restoration

Project Description:

The purpose of the project is to restore anadromous fisheries habitat in non-tidal reaches of rivers and streams, improve watershed conditions impacting salmonid streams, and improve the survival, growth, migration, and reproduction of anadromous fish. The California Department of Fish and Game (CDFG), through the Fisheries Restoration Grant Program (FRGP), uses funds mandated by the California Legislature to restore degraded anadromous fish habitat in coastal streams for a variety of salmonid habitat restoration projects. Restoration projects must be consistent with procedures found in CDFG's "California Stream Habitat Manual".

Location

City:	Various - See Amended Attachment C
County:	Various - See Amended Attachment C
Cross Streets:	
Section, Township, Range:	
Zip code:	Various - See Amended Attachment C
Directions:	
Latitude(s) and Longitude(s):	Various - See Amended Attachment C

Public Notice

Water Board Public Notice: Information regarding this project was noticed on the State Water Board's website from Aug 18, 2011 to Sep 7, 2011.

X No Comments were received. ☐ Comments were responded to in writing.

Fees

Application Fee Provided: A certification fee of 640 was submitted on Jul 26, 2011 as required by 23 CCR §3833b(2)(A) and by 23 CCR § 2200(e). An additional fee of _____ (IF APPLICABLE) to offset additional design impacts was received on _____ as required by 23 CCR §3833b(2)(A) and by 23 CCR § 2200(e).

Hydrologic Information	
Receiving Water(s):	Various - See Amended Attachment C
Hydrologic Unit(s):	Various - See Amended Attachment C
Water Body Type(s):	Riparian and Streambed

Designated Beneficial Use(s)

Candidate, Sensitive, or Special Status Species
California red-legged frog, California freshwater shrimp, coho salmon, chinook salmon, steelhead, coast cutthroat trout, tidewater goby, marbled murrelet, northern spotted owl, willow flycatcher, and rare plants.

Other Permits/Licenses/Agreements/Plans
Federal (Type and Permit/License Number):
The U.S. Army Corps of Engineers issued a Notice to Proceed under RGP 78 (SPL-2011-00627-BAH) for the 18 additional sites in the Camp SLO Road Erosion Prevention Project
State (Type and Permit/License/Agreement Number):
CDFG 1600 Permits
Other County, City, etc. (Type and Permit/License Number):
N/A
Any Required Documents or Plan Submittals (SWPPP, Mitigation & Monitoring, etc.)
Mitigation Measures, Monitoring and Reporting Program (Appendix B of the Mitigated Negative Declarations for the 2011, 2010, 2009, 2009 Addendum, and 2005 FRGPs) and the Biological Opinions from the U.S. Fish and Wildlife Service and National Marine Fisheries Service .

NEPA and/or CEQA Compliance	
Document type:	Mitigated Negative Declaration
Lead Agency:	CDFG
Date completed:	Apr 12, 2011
State Clearinghouse Number:	2009012052

IMPACTS

Describe Potential Water Quality Impacts:

Water quality impacts were analyzed in the 2011 FRGP MND, 2010 FRGP MND, 2009 FRGP MND, the Addendum to the 2009 FRG MND, and the 2005 FRGP MND, and were determined to be less than significant.

Final Project Impacts (Fill)*

Waterbody Type	Permanent			Temporary		
	Acres**	Linear Feet	Cubic Yards	Acres**	Linear Feet	Cubic Yards
Lake						
Ocean						
Riparian	4.568	183021.8		14.3	205566.2	
Streambed						
Vernal Pool						
Wetland						

* Include all three measurements (acres, linear feet and cubic yards) for all federal and non-federal waterbody types.
** Provide acres to three decimal places (e.g., 0.006).

Final Project Impacts (Dredge*/Excavation)**

Waterbody Type	Permanent			Temporary		
	Acres***	Linear Feet	Cubic Yards	Acres***	Linear Feet	Cubic Yards
Lake						
Ocean						
Riparian						
Streambed						
Vernal Pool						
Wetland						

* For projects that will occur annually please provide the total volume to be dredged for the entire certification period (typically 5 years).
** Include all three measurements (acres, linear feet and cubic yards) for all federal and non-federal waterbody types.
*** Provide acres to three decimal places (e.g., 0.006).

Impact Comparison*

	Fill				Dredge			
	Permanent		Temporary		Permanent		Temporary	
	Initial	Final	Initial	Final	Initial	Final	Initial	Final
*Impacts (Acres)***								

* Include impacts to both federal and non-federal waters.
** Provide acres to three decimal places (e.g., 0.006).

MITIGATION

Describe Avoidance and Minimization for Impacts to Waters:

A combination of avoidance and minimization measures is proposed to offset potential effects of project construction to wetlands and waters of the U.S. All restoration projects funded by FRGP will be conducted based on CDFG's California Salmonid Stream Habitat Restoration Manuals and mitigation measures described in the MNDs for the 2011, 2010, 2009, Addendum to the 2009, and 2005 FRGPs.

Describe Compensatory Mitigation for Impacts to Waters (temporary and permanent):

N/A

Compensatory Mitigation (Proponent Provided)

Waterbody Type	Acres Established		Acres Restored		Acres Enhanced		Acres Preserved	
	Temp.*	Perm.	Temp.*	Perm.	Temp.*	Perm.	Temp.*	Perm.
Lake								
Ocean								
Riparian								
Streambed								
Vernal Pool								
Wetland								

* Report as mitigation for temporary impacts at a 1:1 ratio any required conditions to restore the site (e.g., re-vegetating or re-contouring).

Compensatory Mitigation (Mitigation Bank)

Waterbody Type	Acres Established	Acres Restored	Acres Enhanced	Acres Preserved
Lake				
Ocean				
Riparian				
Streambed				
Vernal Pool				
Wetland				

Compensatory Mitigation (In-Lieu)

Waterbody Type	Acres Established	Acres Restored	Acres Enhanced	Acres Preserved
