

**State Water Resources Control Board  
August 17, 2021 – Item 6  
Executive Director’s Report**

**DIVISION OF WATER QUALITY**

**Grazing Guidance Outreach:** State Water Board staff in the Nonpoint Source Unit conducted a series of outreach meetings with targeted stakeholders about the statewide Grazing Guidance under development, a document that will build on and update the 1995 Rangeland Water Quality Management Plan. Meetings were held on July 26, August 2, and August 9, and topics of discussion included management practices to reduce water quality impacts, challenges to implementing management practices, and how the Water Boards can be allies in grazing management in California.

**Public Outreach During Development of Statewide Water Quality Orders:** State Water Board staff continues to work closely with interested parties during the development of statewide permits and orders. A primary focus of ongoing outreach is to identify the funding and technical assistance needs of disadvantaged communities through continued outreach for the following projects:

*Development of Statewide Municipal Stormwater Permit for Small Communities:* State Water Board staff is actively developing a draft reissuance of the existing Statewide Phase II Municipal Stormwater Permit for Small Communities. In addition to the June 2020 public workshops and corresponding focused meetings with representatives of the California Association of Stormwater Agencies, municipalities, school district, and nongovernmental organizations, State Water Board staff is reaching out to the Department of the State Architect and environmental justice organizations to address logistical issues regarding the regulation of stormwater from school sites and small communities located within larger regulated municipalities. Ongoing discussions will focus on how to merge stormwater discharge requirements for small regulated municipalities with that for larger municipalities to take advantage of the economy of scale for both cost and technical expertise. A common goal of numerous interested parties is to merge regulatory requirements and costs in a manner that maximizes local and regional stormwater capture and reuse, providing multiple benefits including water supply augmentation.

*Development of Statewide Sanitary Sewer System General Order:* State Water Board staff has conducted numerous public workshops, outreach events and focused meetings prior to, and after, the recent release of an informal staff draft of a proposed Statewide Sanitary Sewer System General Order reissuance. Staff: (1) held weekly informal discussions with California Association of Sanitation Agency representatives, (2) is attending local system operator business meetings and forums, (3) is continuing to hold technical discussions with representatives of the California Coast Keepers Alliance, and (3) is working closely with representatives of the California Water Environment Association for development to ongoing training for regulated system operators and managers. State Water Board staff is also reaching out to representatives of environmental justice organizations, and sewer system operators of

small disadvantaged communities, to understand the challenges of securing funding and accessing the technical assistance they need. Rather than considering relaxing regulatory requirements that assure safe and sanitary conditions for disadvantaged communities, Water Board staff is focusing on assisting disadvantaged communities to obtain the necessary resources to have resilient sanitary sewer systems.

**Toxicity Study Stakeholder Advisory Committee Meeting:**

The State Water Board contracted with the Southern California Coastal Water Research Project Authority (SCCWRP) to conduct a study to evaluate laboratory performance when conducting the *Ceriodaphnia dubia* chronic aquatic toxicity test method, produce a report that summarizes the study results, and provide recommendations to improve toxicity data quality and comparability for the *C. dubia* chronic aquatic toxicity test method.

SCCWRP staff are currently compiling data from environmental toxicology laboratories that are accredited by the State Water Board to conduct the *C. dubia* chronic aquatic toxicity test method. Data compilation is expected to be completed by the end of August 2021, and initial data analyses are expected to begin in September 2021.

The study is being guided by a Stakeholder Advisory Committee and an Expert Panel. The Stakeholder Advisory Committee is expected to meet again in September 2021, and the Expert Panel is expected to meet again in October 2021. The study is scheduled to be completed in March 2023, with a presentation to the State Water Board by July 2023.

Additional information is available at the [State Water Board toxicity program page](https://www.waterboards.ca.gov/water_issues/programs/state_implementation_policy/tx_ass_cntrl.html) (https://www.waterboards.ca.gov/water\_issues/programs/state\_implementation\_policy/tx\_ass\_cntrl.html) and at the [SCCWRP C. dubia Study page](https://www.sccwrp.org/about/research-areas/additional-research-areas/ceriodaphnia-toxicity-testing-quality-assurance/) (https://www.sccwrp.org/about/research-areas/additional-research-areas/ceriodaphnia-toxicity-testing-quality-assurance/).

**Irrigated Lands Regulatory Program Update:** The Irrigated Lands Regulatory reports are included in Appendix A of this report.

**Statewide Policies and Significant General Permits:** The Statewide Policies and Significant General Permits report can be accessed at: [https://www.waterboards.ca.gov/board\\_info/exec\\_dir\\_rpts/pol\\_per\\_view.html](https://www.waterboards.ca.gov/board_info/exec_dir_rpts/pol_per_view.html)

## **DIVISION OF WATER RIGHTS**

➤ **Drought-related Items**

**Scott and Shasta Rivers:** On July 1, 2021, State Water Board staff held a [public meeting](#) with California Department of Fish and Wildlife (CDFW) staff to provide information and solicit input from the community on potential drought actions that could be implemented in the Scott River and Shasta River watersheds during the ongoing drought. On July 16, 2021, the State Water Board released a [draft drought emergency regulation](#) for the Scott River and Shasta River watersheds for public comment. The

draft drought emergency regulation included drought emergency minimum instream flow requirements for Coho and Chinook salmon provided by CDFW in its June 15, 2021 letter to the Board requesting an emergency regulation for the Scott River and Shasta River watersheds. On July 20, 2021, State Water Board staff held a [public meeting](#) with CDFW staff to provide information and solicit input on the draft regulation. By the close of the public comment period on the draft regulation (July 23, 2021), State Water Board staff received 100 comment letters. Staff are reviewing the comments to determine potential updates to the drought emergency regulation. Additional information on the drought emergency regulation effort is available on the [Scott River and Shasta River Watersheds Drought Response webpage](#) ([https://www.waterboards.ca.gov/drought/scott\\_shasta\\_rivers/](https://www.waterboards.ca.gov/drought/scott_shasta_rivers/)).

➤ *Permitting and Enforcement Branch*

**SB 88 Water Measurement Regulation Notices of Violation:** In July 2021, the Permitting and Enforcement Branch of the Division of Water Rights began sending Notices of Violation to diverters who have not submitted the required information about SB 88 water measurement devices or water measurement data. Water diverters have been required to measure and report their water use under SB 88 since 2016, and Division staff have been providing information and technical assistance to help diverters comply for 5 years. Water right holders who divert more than 1,000 acre-feet and have not yet registered their water measurement devices or submitted the required water diversion measurements received the Notices.

Staff are providing comprehensive compliance assistance to help diverters complete missing reports, report in the correct units, and upload their data to the right location. In addition, staff is providing flexibility to allow submittal of provisional data, and providing additional time to correct the provisional data. Timely, accurate diversion information helps protect the water rights priority system and provides drought resilience for communities and the environment.

➤ *Delta, Hearings, and Special Projects Branch*

**Emergency Regulations for Curtailment of Water Rights in the Delta Watershed:**

On July 27, 2021, the State Water Resources Control Board held a public workshop on the draft curtailment and reporting regulations for diversions in the Sacramento and San Joaquin River Delta watershed that was released for public comment July 23. Staff presented a summary of the regulations and methodology, solicited input and answered questions from stakeholders.

On August 3, 2021, the State Water Board adopted emergency regulations for curtailment of water rights in the Delta watershed with measures to preserve stored water to protect drinking water supplies, prevent salinity intrusion and minimize impacts to fisheries and the environment. The emergency regulation must be approved by the Office of Administrative Law and filed with the Secretary of State before it becomes effective and curtailment orders can be issued.

➤ [Water Quality Certification, Public Trust, Cannabis, Administrative, & Reporting Branch](#)

**Yuba River Development Project:** The public comment period for responses to petitions for reconsideration regarding the July 17, 2020 water quality certification for Yuba County Water Agency’s Yuba River Development Project (Project) concluded on July 30, 2021. The State Water Board received comments from four entities: Yuba County Water Agency; National Marine Fisheries Service; Merced Irrigation District; and a group of nongovernmental organizations including the California Sportfishing Alliance, Friends of the River, Sierra Club Mother Lode Chapter, South Yuba River Citizens League, and Trout Unlimited. The comment letters are available on the [Board’s FTP webpage for the Project](#) (<https://ftp.waterboards.ca.gov/>); the following information should be used to access the comment letters: User Name: YRDP-FTP; Password: Hs2Drth9Qfdas. Additional information is available on the [State Water Board’s Project webpage](#) ([https://www.waterboards.ca.gov/waterrights/water\\_issues/programs/water\\_quality\\_cert/yubariver\\_ferc2246](https://www.waterboards.ca.gov/waterrights/water_issues/programs/water_quality_cert/yubariver_ferc2246)).

**Water Rights Annual Water Use Reporting:** Annual reports for 2020 water use for riparian and pre-1914 water rights (supplemental statements) as well as groundwater recordation were due July 1, 2021. As of the deadline, the percentage of timely filed reports is: 69 percent of supplemental statement reports and 73 percent of groundwater recordation reports. In comparison to last year’s (2019 water use) reporting compliance as of the filing deadline, supplemental statements compliance is within the same range (up one percent) and groundwater recordation is up three percent.

The annual water use reports for 2020 water use under appropriate water rights (permits, licenses, registrations and stockponds) were due April 1, 2021. The table below outlines reporting compliance as of the deadline (April 1) as well as updated compliance information as of July 30.

Report Type	Percent filed by April 1 deadline	Percent filed after April 1 deadline	Percent Outstanding as of July 30, 2021
Report of Permittee	71%	17%	10%
Report of Licensee	63%	17%	19%
Report of Registrant	61%	11%	26%
Stockpond Report	49%	6%	43%

Annual water use reports are required to be electronically submitted via the State Water Board’s [Report Management System](#) (RMS). Additional information is available on the [Annual Water Use Reporting webpage](#) ([https://www.waterboards.ca.gov/waterrights/water\\_issues/programs/water\\_diversion\\_reporting/](https://www.waterboards.ca.gov/waterrights/water_issues/programs/water_diversion_reporting/)). Division of Water Rights staff are available to assist with questions and troubleshooting. Email is the preferred and fastest method for obtaining assistance; emails can be sent to: [rms@waterboards.ca.gov](mailto:rms@waterboards.ca.gov). Water right holders who need assistance over the phone can leave a message at (916) 341-5431 and Division of Water Rights staff will call them back in the order their calls were received.

**Saddlebag Lake Flume Replacement Project:** On July 23, 2021, the Executive Director issued a [water quality certification](#) for Southern California Edison Company's Saddlebag Lake Flume Replacement Project (Project). The Project consists of removal and installation of a Parshall flume downstream of Saddlebag Lake to ensure continued accuracy of flow release measurements in Lee Vining Creek from the Lee Vining Hydroelectric Project (Federal Energy Regulatory Commission Project No. 1388). The Project is located on Lee Vining Creek, nine miles west of the town of Lee Vining in Mono County. The Project is anticipated to take approximately four weeks to complete in early fall 2021.

## **DIVISION OF FINANCIAL ASSISTANCE**

### **Environmental Review**

#### **Future Significant Events**

The Division of Financial Assistant (DFA) staff is continuing to coordinate with the State Historic Preservation Officer staff to discuss next steps in the development of a Programmatic Agreement under Section 106 of the National Historic Preservation Act. The Agreement will provide the State Water Board more authority to complete Clean/Drinking Water State Revolving Fund (SRF) project reviews in-house.

DFA staff is finalizing the Drinking Water SRF Program State Environmental Review Process and will send to the United States Environmental Protection Agency (U.S. EPA) Region 9, Regional Administrator for approval.

DFA staff is coordinating with the U.S. EPA Region 9 SRF staff to start revision process on the Clean Water SRF Environmental Review Process.

<b>California Environmental Quality Act (CEQA) Approvals (July 2021)</b>	
<b>CEQA Lead Agency Documents</b>	
<b>Project No.</b>	<b>Entity - Description</b>
4210024	La Cumbre Mutual Water Company, Well Replacement Project, a Notice of Exemption (NOE) for a categorical exemption (CE) was prepared and sent to Division of Drinking Water (DDW) District Office to approve and file with the Governor's Office of Planning and Research (OPR).
4800801	Neil's Service Center, Nitrate Removal System Project, an NOE for a CE was prepared and sent to DDW District Office to approve and file with the OPR.
3710012	Rancho Pauma Mutual Water Company, Well 7R2 Project, an NOE for a CE was prepared and sent to DDW District Office to approve and file with the OPR.
4410001	Big Basin Water Company, Jamison Springs Temporary Surface Water Treatment Project, an NOE for a CE was prepared and sent to DDW District Office to approve and file with the OPR.

Clean Water	
8059-110	City of Escondido, Membrane Filtration Reverse Osmosis Facility Project, CEQA Determination on a Mitigated Negative Declaration (MND) as the Responsible Agency approved on July 1, 2021, and a Notice of Determination (NOD) was filed with the OPR on July 2, 2021.
8436-110	Santa Cruz County Sanitation District, Valencia Creek Sewer Relocation Project, CEQA Determination on an MND as the Responsible Agency approved on July 9, 2021, and an NOD was filed with the OPR on July 9, 2021.
Drinking Water	
1510007-002C	Frazier Park Public Utility District, Frazier Park Public Utility District Meter Replacement Project and Emergency Replacement Well and Water Supply Project, CEQA Determination on an NOE as the Responsible Agency approved on June 30, 2021, and an NOE was filed with the OPR on July 1, 2021.
1805007-001C	Herlong Public Utility District, West Patton Water System Project, CEQA Determination on an NOE as the Responsible Agency approved on June 30, 2021, and an NOE was filed with the OPR on July 1, 2021.
5400544-001C	Allensworth Community Services District, Allensworth Community Services District Water System Improvement Project, CEQA Determination on an MND as the Responsible Agency approved on July 26, 2021, and an NOD was filed with the OPR on July 27, 2021.
0910002-028C	South Tahoe Public Utility District, Keller Heavenly Water System Improvements Project, CEQA Determination on an NOE as the Responsible Agency approved on July 23, 2021, and an NOE was filed with the OPR on July 23, 2021.
1510023-002C	Lake of the Woods Mutual Water Company, Water Replacement Project, CEQA Determination on an NOE as the Responsible Agency approved on June 30, 2021, and an NOE was filed with the OPR on July 1, 2021.

**Office of Sustainable Water Solutions (OSWS)**

**Planning/Construction Project Summary**

The tables below summarize the planning and construction agreements and amendments approved for the month of July 2021.

Drinking Water Projects Funded (July 2021)		
Project #	Recipient – Project Purpose	Funding Amount
1010030-006C	Tranquility Irrigation District- The District is requesting funding to install water meters that will increase water supply reliability and improve water management.	\$1,382,500

1010049-008C	Biola Community Services District- Construct additional 10-inch and 8-inch water mains to meet fire flow pressure requirements and complete looping of the system. Replace water service lines to 29 homes. Construct a 500,000-gallon ground-level storage tank at Well #4 site with SCADA system to monitor tank and well operations. Install cellular-based automatic meter reading system to collect meter data and leak detection.	\$4,090,000
5410010-018C	Porterville, City of- The Project includes the construction of an additional well to provide the needed source capacity for the consolidation of Akin Water Company, the consolidation of Central Mutual Water Company, as well as satisfy the remainder of East Porterville residents' capacity needs.	\$4,787,664
5410024-003C	Richgrove Community Services District- The proposed project will drill a new domestic well (Well No. 6) and construct a pipeline and intertie to connect the well to both the District and the Rodriguez Farm Labor Camp. The project will also include the construction of a hydropneumatic tank, a storage tank, blending for Well No. 5, a booster pump, a chemical feed pump, and control valves and flow meters.	\$8,764,900
5000255-001P	Chatom Unified School District- The District's Mountain View Middle School water system is under Compliance Order from the Stanislaus County for arsenic MCL violation. The Project will provide planning funds to determine to most feasible solution to address the arsenic MCL violation.	\$480,000

<b>Wastewater Projects Funded (July 2021)</b>		
<b>Project #</b>	<b>Recipient – Project Purpose</b>	<b>Funding Amount</b>
8052-210	Housing Authority of the County of San Joaquin - This project is a regional-scale consolidation project and includes construction of a new pump station, and installation of a 2.2 mile long, 8-inch force main designed to convey the wastewater from the Housing Authority's Thornton developments to the existing Sacramento Area Sewer District Sewer Pump Station located on the west side of Cameron Road, north of Barber Road. From this pump station, the wastewater will be conveyed to the Regional San wastewater treatment plant. The existing WWTF will be decommissioned.	\$6,219,566
8378-210	Calaveras Unified School District- Replacement of existing facilities with onsite treatment using recirculating sand filters and offsite treated effluent irrigation/spray disposal.	\$5,352,770
<b>Drinking Water Projects Amended (July 2021)</b>		
<b>Project #</b>	<b>Recipient – Amendment Purpose</b>	
3301529-001P	Western Water Conservation – Amendment to increase the project cost by \$743,925.	
<b>Wastewater Projects Amended (July 2021)</b>		
<b>Project #</b>	<b>Recipient – Amendment Purpose</b>	
8430-110	City of Weed – Amendment for time extension. No funding increase.	

**Administrator Summary**

No administrator projects were approved in the month of July 2021.

**Technical Assistance Summary**

The following Technical Assistance agreement amendments were executed in the month of July 2021.

<b>Project #</b>	<b>Recipient – Project Purpose</b>	<b>Funding Amount</b>
D1917005, Amendment No. 1	California Rural Water Association – The Project is to provide technical assistance (TA) to perform feasibility analyses and technical evaluations related to consolidation, source/storage capacity, distribution, and treatment to water systems and communities statewide. The Project may provide emergency operational support and TA for capacity development for water systems.	\$6,352,398 SADW Fund
D1917007, Amendment No. 1	Rural Community Assistance Corporation – The Project is to provide a Circuit Rider program to build technical, managerial, and financial capacity for underperforming water systems, dedicated support for regionalization and consolidation projects, planning support that enables water systems to submit complete construction applications for needed improvements, and workshops and other training events addressing water system issues.	\$13,302,650 SADW Fund

The table below summarizes the Technical Assistance work plans approved in the month of July 2021.

<b>Work Plan Type</b>	<b>TA Recipient</b>	<b>Work Plan #</b>	<b>TA Provider</b>	<b>Total Amount Approved</b>
Work Plan Amendment	Anderson Valley Community Services District	6082-C	Rural Community Assistance Corporation (Prop 1)	\$13,836
New Work Plan	Cameron Corners	6228-A	Rural Community Assistance Corporation (SAFER)	\$104,451
New Work Plan	Carrisa Plains Elementary School	6326-A	Rural Community Assistance Corporation (SAFER)	\$31,509
New Work Plan	Big Valley Rancheria Water District	6309-A	Rural Community Assistance Corporation (SAFER)	\$12,295
New Work Plan	Bar “H” Municipal Water Company	6327-A	Rural Community Assistance Corporation (SAFER)	\$60,635
New Work Plan	Fall River Valley CSD	6376-A	University Enterprises, Inc. (SAFER)	\$404,710

Work Plan Type	TA Recipient	Work Plan #	TA Provider	Total Amount Approved
Work Plan Amendment	Lancaster	5975-C	University Enterprises, Inc. (SAFER)	\$186,048
Work Plan Amendment	Cobb Area CWD	6039-B	University Enterprises, Inc. (SAFER)	\$44,675
Work Plan Amendment	City of Sand City	5336-F	Council for Watershed Health (CWH)	\$325,157
Work Plan Amendment	Ali Mutual Water Company	5879-B	Self-Help Enterprises	\$136,655
Work Plan Amendment	Lamont Public Utility District	5940-D	Self-Help Enterprises	\$209,600
Work Plan Amendment	Tombstone Territory	5295-B	Self-Help Enterprises	\$167,700
New	City of Sanger	6356-A	Self-Help Enterprises	\$89,600

**Safe and Affordable Funding for Equity and Resilience (SAFER) Summary (includes Safe and Affordable Drinking Water Fund, Proposition 84 Emergency, General Fund, and CAA Urgent Drinking Water Needs funding sources)**

No projects were approved in the month of July 2021.

**Funding Provided for Emergency Drought Response**

The table below summarizes the Emergency Drought Response Projects approved in the month of July 2021.

<b>Emergency Drought Response List of All Approved Projects July 2021</b>				
Recipient	Project Purpose	Funding Program	Category	Funding Amount
Highlands MWC	Low lake levels, Lowering intake pumps	CAA UDWN	Interim Solution	\$60,000
Lake Shasta Pines RV Park and Campground	Water Outage, hauled water	CAA UDWN	Hauled Water	\$65,000
Shasta County Department of Public Health for Shasta County - CSA #2, Sugarloaf	Water Outage, hauled water	CAA UDWN	Hauled Water	\$96,096

5	1059	1084	1080	1072	1069
Total	6199	6353	6352	6335	6341

### Future Significant Events

Approved examination applicants that submitted applications after the Fall 2020 examination deadlines, up through present, will be provided scheduling opportunities.

An overview of the CBT process and Frequently Asked Questions document is available on the Operator Certification websites:

[Drinking Water Treatment & Distribution System Operators | California State Water Resources Control Board](#)

[Wastewater Operator Certification Program | California State Water Resources Control Board](#)

### **Marketing and Outreach**

The Marketing and Outreach unit presented funding information for the Drinking Water and Clean Water State Revolving Fund at The Integrated Regional Water Management (IRWM) Roundtable of Regions stakeholders meeting on July 21, 2021. The Roundtable of Regions is a consortium of representatives from IRWM Regions around the state.

## DIVISION OF DRINKING WATER

### New Drinking Water Regulations Effective July 1, 2021

Two new drinking water regulations took effect July 1, 2021. The Revised Total Coliform Rule (RTCR) and a revised perchlorate detection limit for purposes of reporting (DLR).

On May 28, 2021, the Office of Administrative Law approved the Revised Total Coliform Rule adopted by the State Water Board on February 2, 2021. The RTCR includes a new *E-coli* MCL and a coliform treatment technique requirement that replaces the total coliform MCL. The RTCR establishes a “find-and-fix” approach for investigating and correcting causes of microbial contamination and requires public water systems that continuously disinfect groundwater sources to collect a raw water coliform sample once a quarter. Additional information on California's Revised Total Coliform Rule can be found at [https://www.waterboards.ca.gov/drinking\\_water/certlic/drinkingwater/rtcr.html](https://www.waterboards.ca.gov/drinking_water/certlic/drinkingwater/rtcr.html).

On June 17, 2021, the Office of Administrative Law approved the perchlorate DLR regulations adopted by the State Water Board on October 6, 2020. The DLR changed from 0.004 mg/l to 0.002 mg/l on July 1, 2021 and will further decrease to 0.001 mg/l on July 1, 2024. Additional information on the perchlorate regulation can be found at: [https://www.waterboards.ca.gov/drinking\\_water/certlic/drinkingwater/Perchlorate.html](https://www.waterboards.ca.gov/drinking_water/certlic/drinkingwater/Perchlorate.html).

### Permits

Permits are issued when a public water system undertakes action that may impact public health (i.e. a new source of supply, modifying treatment or adding a large distribution reservoir), when the original permit has numerous amendments, or following new regulations or conditions that DDW deems necessary for the protection of public health.

The following 174 permits were issued between June 26 and July 25, 2021. Permits showing “transfer to DDW” are public water systems being returned by counties giving back their Local Primacy Agency (LPA) programs such as San Diego County and Amador County.

<b>Water System</b>	<b>Permit Type</b>	<b>Permit Purpose</b>
ADELANTO, CITY OF	FULL PERMIT	Incorporate several permit amendments and include interconnection with Mojave Water Agency.
AGUA CALIENTE COUNTY PARK	FULL PERMIT	FULL PERMIT (LPA ISSUED)-Transfer to DDW
AGUA CALIENTE COUNTY PARK	FULL PERMIT	FULL PERMIT (LPA ISSUED)-Transfer to DDW
ALPINE AMERICAN LEGION	FULL PERMIT	FULL PERMIT (LPA ISSUED)-Transfer to DDW
ALPINE OAKS ESTATES LLC	FULL PERMIT	FULL PERMIT (LPA ISSUED)-Transfer to DDW
APPLE WATER IS GOOD	FULL PERMIT	FULL PERMIT (LPA ISSUED)-Transfer to DDW

APPLE WATER IS GOOD	FULL PERMIT	FULL PERMIT (LPA ISSUED)-Transfer to DDW
AUERBACH FARMS	FULL PERMIT	FULL PERMIT (LPA ISSUED)-Transfer to DDW

### **Violations & Enforcement actions**

Violations for a water system include whether the system has failed to follow established monitoring and reporting schedules, failed to comply with mandated treatment techniques, violated any Maximum Contaminant Levels, or failed to

communicate required information to their customers. Enforcement Actions are used to obtain water system compliance with drinking water requirements to provide a safe and reliable supply of water. The Division of Drinking Water's formal enforcement actions involve the use of statutory authority and includes issuance of citations and compliance orders.

The following enforcement actions were documented from July 1 to July 31, 2021.

### **Environmental Laboratory Accreditation Program (ELAP)**

#### **Accreditation Activities**

<b>ELAP ACCREDITATIONS ISSUED</b>		
	<b>July 2021</b>	<b>Year-to-Date</b>
New Accreditations	1	4
Renewed Accreditations	27	194
Reciprocity Accreditations	4	36
Amended Accreditations	12	41
<b>Total</b>	<b>44</b>	<b>232</b>

**Enforcement Actions – July 2021**

<b>ELAP ENFORCEMENT ACTIONS</b>			
<b>Laboratory</b>	<b>Certificate Number</b>	<b>Action</b>	<b>Detail</b>
CEL Analytical Inc.	2647	Notice of Violation	Failed to perform precision and accuracy checks on a sample and reported positive E. Coli data; failed to follow reporting standards
Zalco Laboratories Inc.	2791	Citation (\$10,000); Notice of Violation	Failed to notify water supplier within 24 hours of detecting acute contaminate; failed to report timely data to the Division of Drinking Water

**Roadmap to ELAP Accreditation**

ELAP continues to support laboratories in transitioning to new regulatory requirements through a compliance assistance initiative, the Roadmap to ELAP Accreditation, including one-on-one Transition Appointments with individual laboratories to answer questions and help them create a plan. Laboratories may request an appointment by emailing ELAP’s general email inbox.

The ninth and tenth session of the TNI Quality System Documentation Workshop were delivered in July and registration is now open for sessions through the end of 2021. The virtual workshop is broken into four parts over the course of two days with a maximum of 30 attendees per class. The workshop includes an introductory course about the TNI Standard and its requirements. The workshop materials provide fillable templates, requirements & explanations, examples of Policies & Procedures, Job Aid to identify where the TNI Standard requires specific policies, procedures, and records. The meetings are being recorded and edited for posting on ELAP’s website.

**National Environmental Monitoring Conference 2021**

ELAP staff will present at the National Environmental Monitoring Conference hosted by the US EPA and the NELAC Institute. Staff will present at three different sessions – an enforcement case study on inappropriate laboratory practices, operational issues impacting the environmental laboratory industry, and efforts to accredit laboratories for monitoring of microplastics in California.

## **ELTAC Meeting**

ELAP's advisory committee, ELTAC, met for the second time in 2021 on July 30, 2021. This meeting largely focused on Water Boards programs that had new or upcoming requirements that needed a new methodology. Water Boards programs included were DDW for Microplastics, DWQ for the Winery Order, and Central Valley Water Board for Imidacloprid.

## **ELTAC Subcommittee on Method Selection for Regulatory Testing**

ELTAC created a subcommittee in January 2021 to develop guidance on how laboratory methods should be developed and what criteria California's regulatory agencies should consider when selecting laboratory methods to utilize for their regulatory programs. The subcommittee held its fifth meeting on July 12, 2021 where they distributed and discussed a draft of its guidance document. Work will continue and progress will be discussed during the next meeting to be scheduled.

## **DDW & DWQ PFAS Strategy Team**

ELAP staff continues to regularly participate in the multi-divisional strategy team for regulation of PFAS. New staff are being brought into the project to build a robust knowledge base and provide additional technical assistance.

## **Recycled Water:**

On July 21, 2021, an inspection of the second largest UltraViolet (UV) disinfection plant in the country was conducted at the Los Angeles Department of Water and Power (LADWP) 650 million gallon per day (MGD) facility to disinfect water out of the Los Angeles Reservoir (LAR) to meet the Long Term 2 Surface Water Treatment Rule. The LAR UV system is designed to disinfect and inactivate 99.9% *Cryptosporidium* via 15 UV reactors that are 48-inch in diameter and can disinfect up to 50 MGD each.

That afternoon, the same staff toured the Donald C. Tilman (DCT) Reclamation Plant that treats up to 80 MGD. The plant provides recycled water to many users in the San Fernando Valley and the City of Los Angeles Department of Public Works. DCT is upgrading their treatment with a 10 MGD side stream ozonation plant, which will provide water to spread at the Hanson recharge basins. The project will replenish the San Fernando groundwater basin.

The final stop of the day was an inspection of the Hanson Spreading Grounds (HSG). Rainwater and stormwater runoff from the San Gabriel mountains is currently spread to replenish the groundwater basin. The highly treated recycled water from the ozone plant at DCT will supplement the water supply via wells in the San Fernando Valley. At the time of the inspection of HSG, the spreading basins were completely dry, which is a sign of the drought and the need for resilient new water sources such as treated recycled water from DCT.

## DDW-SAFER

### The SAFER Clearinghouse Summary Results for July 2021 (on 8/2/2021)

Summary Results			
HR2W Systems	343	Removed HR2W Systems	4

### Water Systems Removed from the HR2W List in July 2021

PWS ID	System Name	Date	County	Pop	Notes
CA3700073	H & J WATER COMPANY	7/5/21	SAN DIEGO	50	Monitoring & Reporting Violations Addressed
CA3600184	NORTH SHORE MWC	7/19/21	SAN BERNADINO	25	Treatment for uranium installed.
CA3700900	LAKE HENSHAW RESORT, INC.	7/19/21	SAN DIEGO	300	Monitoring & Reporting Violations Addressed
CA3700936	RANCHO ESTATES MUTUAL WATER CO.	7/19/21	SAN DIEGO	200	Nitrate levels in compliance natural attenuation

### Water Systems Added to the HR2W List in July 2021

PWS ID	System Name	Date	County	Pop.	Notes
CA1400511	MEADOW LAKE APARTMENTS	7/5/21	INYO	22	Monitoring & Reporting Violations
CA1900903	SLEEPY VALLEY WATER COMPANY	7/19/21	LOS ANGELES	130	Nitrate Violation
CA5602109	GLENVIEW MOBILE PARK	7/19/21	VENTURA	160	Manganese Secondary Standard
CA1200729	ORLEANS C.S.D.	7/26/21	HUMBOLDT	636	E.coli Violation
CA1510007	FRAZIER PARK PUD	7/26/21	KERN	2,691	Nitrate Violation

## SAFER Engagement Units

### Administrator Process Initiated for Teviston Community Service District

A letter of intent to designate Teviston Community Service District as a public water system in need of an administrator was sent by the Division on July 16, 2021. The need for an administrator is based on the failure to obtain compliance with the 1,2,3-trichloropropane maximum contaminant level by the compliance order deadline of April 30, 2021, and failure to properly maintain existing infrastructure to ensure an adequate supply of water for its residents at all times.

### Water Partnership Workshop Virtual Events on July 15, 2021 and July 22, 2021

On July 15, 2021 and July 22, 2021, the SAFER Engagement Units held its first two virtual water partnership workshops in Monterey and Kern counties, respectively. The purpose of the workshop was to learn how water system partnerships can benefit water systems and how to leverage resources to increase Technical, Managerial, and Financial (TMF) capacity. The workshop also offered two free contact hours for water operators. Some of the topics discussed were background information on the area, partnership overview, funding opportunities, and partnership success stories. Attendees had the opportunity to participate in breakout rooms to discuss current challenges and possible partnership solutions. The SAFER Engagement Units will be hosting 14 additional Virtual Water Partnership Workshops in 2021. Upcoming workshops can be found at the website below:

[https://www.waterboards.ca.gov/drinking\\_water/certlic/drinkingwater/wpc\\_events.html](https://www.waterboards.ca.gov/drinking_water/certlic/drinkingwater/wpc_events.html)

The SAFER Engagement Units also sent out approximately 130 letters to public water systems and/or state small water systems this month inviting them to the workshops and/or recommending that they investigate consolidation.

### Prevention of new public water system

In March 2021, Caltrans submitted a preliminary technical report for their proposed public water system, SB Cottonwood Commercial Vehicle Enforcement Facility (Cottonwood), for review. After review of their application, the Northern SAFER Engagement unit in conjunction with the Valley District, determined that consolidation with Caltrans' NB Cottonwood CVEF water system was feasible and would be the most cost-effective option. On July 8, 2021, Caltrans informed the State Water Board of their intention to abandon pursuit of having a new on-site water system in favor of connecting water supply from their existing public water system.

### New Orchard Consolidation

New Orchard Mobile Home Park served 53 customers through 43 service connections. This water system operated two groundwater wells to meet its drinking water demand- both of which exceeded the arsenic maximum contaminant level. On January 29, 2009, Tehama County Environmental issued a Compliance Order No. 01-21-09(02) to the water system for violating the arsenic primary drinking water standard. In 2009, a compliance report prepared by professional engineers of Nolte Associates, established that the preferred alternative for New Orchard to comply with the arsenic standard was for New Orchard to consolidate with the Los Molinos CSD. The construction project included a production well (Well No. 5) within Los Molinos Community Services District service area and transmission pipeline to consolidate New Orchard Mobile Home Park as well as Millstream Mobile Home Park. New Orchard Mobile Home park was physically connected to Los Molinos CSD on June 22, 2021.

Lean Six Process Improvement Event for Administrator Process – July 8 & 9, 2021

The SAFER Engagement team did a two-day intensive administrator process improvement event. During the event, staff mapped current administrator process flows, estimated project touch times and lead times for all tasks and identified 21 process improvements to increase efficient on administrator projects.

**Completed Consolidations Summary**

The following water system consolidations were completed during July 2021

Name	Type	Pop.	County	Notes
New Orchard Mobile Home Park	C	53	Tehama	Arsenic above the maximum contaminant level

**DIVISION OF ADMINISTRATIVE SERVICES**

**Update on Water Quality, Water Rights, Drinking Water and ELAP Fees Stakeholder Process**

Staff held a meeting on July 9 to discuss FY 2021-22 fees with Cannabis program stakeholders. Staff also held the third and final stakeholder meetings to discuss FY 2021-22 fees with the following programs: August 5 – Water Quality and Water Rights and August 6 – Drinking Water/Environmental Laboratory Accreditation Program. Staff is planning to take proposed fee changes for FY 2021-22 for all four programs to the September 21 Board Meeting for the Board’s consideration.

**OFFICE OF ENFORCEMENT**

**ACL Complaints Issued:**

No Administrative Civil Liability (ACL) Complaints were issued in July 2021.

**ACL Orders Issued:**

Region	Discharger/City	Violation(s) Addressed	ACL Order Amount	Date Issued
2	Castro Valley Market Place, LLC/ Castro Valley	Mandatory Minimum Penalty (MMP) for: <ul style="list-style-type: none"> <li>• Exceedance of the maximum daily effluent limit (MDEL) for zinc</li> <li>• Exceedance of the average monthly effluent limit (AMEL) for zinc</li> <li>• 2 exceedances of the MDEL for copper</li> <li>• 2 exceedances of the AMEL for copper</li> </ul>	\$18,000 (MMP - all to Cleanup and Abatement Account (CAA))	7/28/2021

Region	Discharger/City	Violation(s) Addressed	ACL Order Amount	Date Issued
3	South San Luis Obispo CSD/ Oceano	MMP for: <ul style="list-style-type: none"> <li>• 2 exceedances of the instantaneous maximum effluent limit for total residual chlorine</li> <li>• Exceedance of the MDEL for fecal coliform</li> </ul>	\$9,000 (MMP - all to CAA)	7/2/2021
9	Five Safe T, LLC/ Temecula	Failing to timely obtain regulatory coverage for discharges from a commercial agricultural operation in the San Diego Region	\$1,000	7/27/2021

### Cleanup and Abatement Orders

Region	Discharger/City	Violations Addressed/Action(s) Required	Date Issued
5S	Cassinelli, Mondani, Darius/ Ione	Order No. R5-2021-0700 requiring the cleanup and abatement of wastes associated with unauthorized releases from historic mining activities at Newton Copper Mine. Responsible Parties shall investigate and characterize the waste, clean up and abate the effects of the waste, and monitor the mine site to document clean up progress.	7/21/2021
9	Raytheon Technologies/ Chula Vista	Order No. R9-2021-0042 requiring the cleanup and abatement of waste discharged from the Rohr/Goodrich North Campus Property in Chula Vista and discharges of waste to soil, soil gas, and groundwater that have migrated and continue to migrate from the North Campus Property offsite areas.	7/12/2021

### Time Schedule Orders

Region	Discharger/City	Violations Addressed/Action(s) Required	Date Issued
5S	Shasta Lake City/ Shasta Lake	Order No. R5-2021-0900 requiring compliance with final effluent limits for ammonia, nitrate plus nitrite, pH, and zinc. The Order requires annual progress reports, the development of a pollution prevention plan (PPP) for zinc, and the development of a workplan and schedule should the PPP not result in compliance.	7/12/2021
8	Toyota Racing Development USA Inc/ Costa Mesa	Order No. R8-2021-0036 requiring compliance with Amended Industrial Stormwater General Permit (IGP) numeric effluent limitations for copper and zinc.	7/23/2021

## 13267 Investigative Orders

Region	Discharger/City	Violations Addressed/Action(s) Required	Date Issued
3	Seco Property Company, LLC and Clark and Christopher Codiga/ Watsonville	Requirement for a workplan for additional site investigation at the former East Lake Dry Cleaners at 928 East Lake Avenue in Watsonville to evaluate the extent of tetrachloroethene PCE contamination in soil vapor and groundwater.	7/16/2021
3	1) City of Santa Maria 2) City of Santa Cruz Public Works Department 3) City of Watsonville 4) County of Santa Cruz 5) County of Santa Barbara Public Works 6) City of Lompoc 7) City of Paso Roble 8) Chicago Grade Landfill, Inc. 9) Waste Connections, Inc. 10) Salinas Valley Solid Waste Authority	Requirement to submit a technical report in the form of a workplan within 90 days of the date of letter to determine if the detections of per- and polyfluoroalkyl substances (PFAS) are a release from the landfill and implement measures to prevent impacts to groundwater, drinking water users, and surface water from landfill activities.	7/14/2021

### Other Enforcement Actions Taken:

Region/Division	Actions Issued	Region/Division	Actions Issued
1	1	5S	17
2	2	6T	1
3	3	6V	3
4	16	7	0
5F	1	8	52
5R	2	9	13

## OFFICE OF INFORMATION MANAGEMENT AND ANALYSIS

**California Water Quality Monitoring Council Meeting:** The California Water Quality Monitoring Council met on August 12, 2021. The agenda focused on topics centered around sub-committee updates: For more information on the meeting please navigate to: [https://mywaterquality.ca.gov/monitoring\\_council/meetings/index.html](https://mywaterquality.ca.gov/monitoring_council/meetings/index.html)

For more information please and to receive updates by email regarding activities of the California Water Quality Monitoring Council. Subscribe online to the "[California Water Quality Monitoring Council](#) (SB1070)" emailing list under General Interests. You can

also subscribe to the Monitoring Council's YouTube channel to see recordings of all the meetings <https://www.youtube.com/channel/UCfq3UT8xzT9In0RUWSMOrxQ>.

**Healthy Watersheds Partnership (HWP) Meeting:** The HWP (a working group of the California Water Quality Monitoring Council) met on August 10, 2021. The meeting included presentations by several partner staff including a talk by Southern California Coastal Water Research Project on a watershed prioritization tool, California Natural Resources agency staff presentation on the California FORESITE project and an update on Surface Water Ambient Monitoring Program (SWAMP) staff's efforts to develop a watershed assessment dashboard/tool. SWAMP staff are working closely with each of the related project leads to ensure these watershed protection and restoration resources are coordinated and consistent. For more information please visit: [https://mywaterquality.ca.gov/monitoring\\_council/healthy\\_watersheds/](https://mywaterquality.ca.gov/monitoring_council/healthy_watersheds/)

**California Freshwater Harmful Algal Bloom August Status Update:** With water levels lower this year, harmful algal blooms (HABs) have been more prevalent throughout the state. Water bodies are experiencing longer blooms and earlier in the year. This year, the Interagency HAB-related Illness Workgroup has already investigated over 40 potential HAB-related illnesses in human and animals in California as compared to 24 in 2019 and 29 in 2020. In late July, the Water Board issued a press release for the Trinity River for toxic algal mats in response to a potential toxic algae-related dog death. The Water Boards, working with Trinity County, have posted advisory signage on miles of the river. The Water Boards is also currently working with Sonoma County for a second press release this summer for the Russian River. The [HAB Program](#) is currently gearing up for the last holiday assessment aimed for Labor Day. Water Board staff work with partnering agencies to perform sampling and populate the [HAB Incident map](#) for the public to reference before recreating in some of the more popular waterbodies over the major holiday weekend.

## **OFFICE OF RESEARCH, PLANNING, AND PERFORMANCE**

### **Water Conservation**

The response rate for the June 2021 Urban Water Conservation Report is 89% as of the writing of this report (367 reports submitted). Of the submitted reports, 321 of the reports provide final production numbers, while 46 of the reports indicate that the production data is preliminary. The estimated total production (accounting for missing reports) is 190.8 billion gallons, and the statewide R-GPCD is 111 GPCD. 88 out of the 367 reports (24.0%) indicate that the reporter's agency is experiencing a water shortage greater than 10% of the agency's water supply.

### **COVID-19**

The water shutoff reporting site received 10 reports for the month of July.

### **Climate Change**

Facilitation of regular meetings continues with Regional Water Board 1 and the Coastal Commission on the Arcata wastewater treatment facility's planned upgrades that conflict with impending sea level rise.

## IRRIGATED LANDS REGULATORY PROGRAM UPDATE July 2021

This month's Irrigated Lands Regulatory Program (ILRP) update provides a summary of significant activities of State Water Resources Control Board (State Water Board) from June 15, 2021 to July 15, 2021, and the Central Valley Regional Water Quality Control Board's (Regional Water Board) Program from May 15, 2021 to July 15, 2021. Next month's report will present activities of the North Coast, San Francisco Bay, Central Coast, Los Angeles, Lahontan, Colorado River Basin, Santa Ana and San Diego Regional Water Boards' Programs and cover the time period from June 15, 2021 to August 15, 2021.

**State Water Board** staff continue assisting the regions in GeoTracker modification and implementation. Primarily, staff has been working with the Central Coast Regional Water Board staff to modify their reporting forms for the recently adopted Agricultural Order.

The **Central Valley Water Board** will consider a resolution to exempt the Goose Lake Subwatershed (Modoc County) from the ILRP during the August Board Meeting. The recommendation is based on Central Valley Water Board staff work with UC Rangelands to gather information and evaluate regulatory options for the ILRP to be more relevant and meaningful for irrigated pasture and low-threat crops in the upper watersheds. The information included pesticide use data, nitrogen/fertilizer use data, management practice data, geographic data, and economic analysis results. All comment letters received on the draft resolution have been in support of the effort.

Also scheduled for the August Central Valley Water Board meeting is an information item regarding the on-farm drinking water well monitoring program, required by State Water Resources Control Board Order WQ-2018-0002. This program is initiated in eleven coalition areas, with over 7,000 wells monitored for nitrate and nitrite as nitrogen. The monitoring data is publicly available on GeoTracker.

Central Valley Water Board staff hold regular ILRP stakeholder meetings to provide an open forum for communication between staff, agricultural coalitions, environmental justice groups, and other interested parties in Central Valley Region. The last meeting was held on July 14<sup>th</sup> and focused on the development of Groundwater Protection Values.

Additional program information can be found at the [Central Valley Regional Board ILRP website](https://www.waterboards.ca.gov/centralvalley/water_issues/irrigated_lands/index.html) ([https://www.waterboards.ca.gov/centralvalley/water\\_issues/irrigated\\_lands/index.html](https://www.waterboards.ca.gov/centralvalley/water_issues/irrigated_lands/index.html))
