Subject: JANUARY 25 WEEKLY UPDATE ON CURTAILMENT STATUS OF WATER RIGHTS AND CLAIMS IN THE DELTA WATERSHED – REIMPOSITION OF CURTAILMENTS ON SOME TRIBUTARIES

This email contains important information about the curtailment status of water rights and claims of right within the Sacramento-San Joaquin Delta (Delta) watershed pursuant to orders that were issued on August 20, 2021 ([Order for water rights/claims under 5,000 acre-feet](#) and [Order for water rights/claims over 5,000 acre-feet](#)).

Based on recent water supply forecasts, **curtailment statuses have been updated to re-impose curtailments in some subwatersheds starting Wednesday, January 26, 2022.** Water supply forecasts will continue to be evaluated regularly to determine if, when, and to what extent the further re-imposition or suspension of curtailments may be appropriate, and a curtailment status update will be provided by email and web posting no later than February 1, 2022. Please check the [Delta Watershed Curtailment Status List](#) for the current curtailment status of each water right and claim in the Delta watershed.

The following priorities of right are **curtailed effective tomorrow, January 26, 2022,** unless and until the State Water Board advises that this determination has been updated:

1. Water rights and claims on the following Sacramento River tributary:
 - a. Post-1914 appropriative water rights in the Putah Creek subwatershed outside of the Legal Delta with a priority date of 1945 or later.
2. Water rights and claims on the following San Joaquin River tributary:
 - a. Post-1914 appropriative water rights in the Fresno River subwatershed with a priority date of 1959 or later.

Available water supplies from recent precipitation events have declined, resulting in the re-imposition of curtailments in multiple subwatersheds. The decision to re-impose curtailments is based on water supply forecasts from the California Nevada River Forecast Center (CNRFC) that were updated on January 25, 2022, as well as forecasts from the California Department of Water Resources (DWR). The 75% exceedance water supply forecast was selected to determine curtailments at this time due to prolonged dry conditions observed throughout the Delta watershed during the month of January. Curtailment statuses will be reassessed next week (or earlier if appropriate) based on daily water supply observations and updated forecasts. Demand data informing curtailments continue to be based on reported diversions from 2018.

Water right holders and claimants are responsible for monitoring their curtailment status online on the [Delta Watershed Curtailment Status List](#). Notice of changes to curtailment status will not be mailed. For those with limited internet access, a pre-

recorded curtailment summary can be heard on the Delta Curtailment Status phone line at (916) 323-4643.

For more information about drought in the Delta watershed, please visit the [Delta Drought webpage](#). For more information about curtailment compliance and responses to the August 20 Orders, please visit the [Curtailment Compliance and Responses webpage](#). The Curtailment Compliance and Responses tracker is updated regularly and can be filtered to see the latest changes. If you have any questions, you may send an email to Bay-Delta@waterboards.ca.gov or call the Delta Drought phone line at (916) 319-0960.
