

CERTIFIED ENVIRONMENTAL LABORATORIES

If water sample results from your tap/well indicate the presence of contaminants in your drinking water at levels close to or above public health drinking water standards, we recommend that you re-test your water to confirm the results. In addition, the U.S. Environmental Protection Agency recommends annual testing of domestic wells used for drinking water purposes.

The California Department of Public Health (CDPH) certifies environmental laboratories via its [Environmental Laboratory Accreditation Program \(ELAP\)](#) that can test water samples from your tap/well for a fee. If you wish to have your well re-tested, you may choose from any CDPH certified laboratory. Below is a list of certified environmental laboratories in the northern portion of the Central Coast.

ELAP CERTIFIED LABORATORIES IN THE NORTHERN PART OF THE CENTRAL COAST REGION

Lab Name	Address	City	Phone
Fruit Growers Laboratory, Inc.	3442 Empresa Drive, Suite D	San Luis Obispo, CA 93401	(805) 783-2940
