BACKGROUND

The SAFER (Safe and Affordable Funding for Equity and Resilience) program is a set of tools, funding sources, and regulatory authorities designed to ensure that one million Californians who currently lack safe drinking water receive safe and affordable drinking water as quickly as possible. SAFER funds, including the Safe and Affordable Drinking Water Fund (Fund), will help water systems provide safe, accessible, and affordable supplies of drinking water to communities in both the short and long terms.

The Fund was created in 2019 to fund projects to help water systems provide an adequate and affordable supply of safe drinking water (see Health and Safety Code section 116766). The Fund is administered by the State Water Board, which is required to develop and adopt a Fund Expenditure Plan each year and consult with the Advisory Group to aid in meeting the purposes of the Fund Expenditure Plan.

The Advisory Group is a consultative body that advises the Board on development of the Fund Expenditure Plan, and other key analyses and policies as needed. The Advisory Group is not authorized to approve any of these documents or make policy decisions respecting them. It is the role and sole prerogative of the Board to approve and adopt the Fund Expenditure Plan each year.

State Water Board Resolution No. 2019-0060 authorizes the Executive Director of the Board, or her designee, to perform all acts necessary or convenient to form the Advisory Group, including, but not limited to, the appointment of Advisory Group Members.
