Common Errors

PET Tool Errors

- Run-time Error 52 or 75

  Problem:
  User installed the CDF application with administrator account but is login with a non-administrator account.

  Solution:
  Have IT staff give user account (non-administrator) rights to write to C:\Temp (Windows 2000) or C:\Windows\Temp (Windows XP).
  Or
  Have the user login with the administrator account and export file.

- Run-Time Error 13

  Problem:
  During the Export process the Macro has detected a row or rows are missing one or more fields (Monitoring Location ID, Parameter, Analytical Method, Units).

  Solution:
  Check to make sure all data for monitoring location, parameter, analytical method or units are populated.

Upload Errors

- Pass 1 Errors:
  Windows/Temp/CDF.CSV, line 5: required PARVQ field not present.

  Solution:
  Verify that a Qualifier is entered on row 6 in the PET Tool.

- Pass 1 Errors:
  Windows/Temp/CDF.CSV, line 5: field PARVAL contains invalid numeric value 'nd'.

  Solution:
  Update the Result entered on row 6 in the PET Tool to a numeric value.

- Pass 1 Errors:
  An IO Exception occurred: error in opening zip filePass 2 Errors: None found.

  Solution:
  You are attempting to upload CDF Excel Workbook. Upload zip file only.
