

History and Purpose

Delta Measurement Experimentation Consortium

In fall 2016, the State Water Resources Control Board Office of the Delta Watermaster initiated sponsorship of the Delta Measurement Experimentation Consortium (Consortium) to develop a path toward the implementation of Senate Bill (SB) 88 related to diversion measuring and reporting. The Consortium invites stakeholders to meet quarterly to review results of on-going experiments related to:

- 1) meter brands/makes/types;
- 2) device costs;
- 3) unforeseen challenges and potential solutions; and
- 3) data recording/retrieving methods.

The Consortium also aims to develop diversion measuring and reporting protocols to facilitate the implementation of the SB 88.
