

GAVIN NEWSOM
GOVERNOR

JARED BLUMENFELD
SECRETARY FOR
ENVIRONMENTAL PROTECTION

State Water Resources Control Board

October 20, 2020

Mr. Mark J. Sedlacek
Director of Environmental Affairs
Los Angeles Department of Water and Power
Post Office Box 51111
Los Angeles, CA 90051-5700

Dear Mr. Sedlacek:

RE: INVOICE FOR THE 2018-2019 INTERIM MITIGATION PERIOD FOR HARBOR GENERATING STATION - ONCE-THROUGH COOLING POLICY

This letter serves as an invoice for Harbor Generating Station's interim mitigation payment for the operating period of October 1, 2018, through September 30, 2019 (2018-2019 interim mitigation period). The final determination calculating the interim mitigation payment is included as Attachment A.

The State Water Resources Control Board's (State Water Board) Statewide Water Quality Control Policy on the Use of Coastal and Estuarine Waters for Power Plant Cooling (Once-Through Cooling or OTC Policy) requires owners or operators of existing power plants to implement measures to mitigate interim impingement and entrainment impacts resulting from their cooling water intake structures. The interim mitigation period commenced on October 1, 2015, and continues up to and until owners or operators achieve final compliance with the OTC Policy. Section 2.C(3) of the OTC Policy provides options for demonstrating compliance with the interim mitigation requirements.

As stated in the 2015-2016 Final Determination for Harbor Generating Station¹, Los Angeles Department of Water and Power (LADWP) elected to comply with the interim mitigation requirements in Section 2.C(3)(b) of the OTC Policy. Under this option, LADWP demonstrates compliance with the interim mitigation requirements by providing funding to the Ocean Protection Council or State Coastal Conservancy to fund appropriate mitigation projects.

The State Water Board calculated the interim mitigation payment for Harbor Generating Station for the 2018-2019 interim mitigation period using information provided by LADWP in its February 7, 2020 information response letter. The annual interim mitigation payment is the sum of three components: an entrainment payment, an

E. JOAQUIN ESQUIVEL, CHAIR | EILEEN SOBECK, EXECUTIVE DIRECTOR

impingement payment, and a management and monitoring payment. The interim mitigation payment for Harbor Generating Station for the operating period of October 1, 2018, through September 30, 2019, is \$101,597.81.

LADWP has 60 days from receipt of this letter to make this payment to the Natural Resources Agency's Ocean Protection Council. When submitting this payment, include a cover letter that identifies the National Pollution Discharge Elimination System number for Harbor Generating Station and copy Karen Mogus, Deputy Director of the Division of Water Quality at the State Water Board. Please make the check payable to the Natural Resources Agency and send to:

California Natural Resources Agency

**FINAL DETERMINATION TO APPROVE MITIGATION MEASURES
FOR THE WATER QUALITY CONTROL POLICY ON THE USE OF
COASTAL AND ESTUARINE WATERS FOR POWER PLANT COOLING:**

**HARBOR GENERATING STATION
OCTOBER 1, 2018 THROUGH SEPTEMBER 30, 2019**

Interim Mitigation Requirements and Determinations

The State Water Resources Control Board's (State Water Board) Water Quality Control Policy on the Use of Coastal and Estuarine Waters for Power Plant Cooling (also known as the Once-Through Cooling or OTC Policy) requires owners or operators of existing power plants to implement measures to mitigate interim impingement and entrainment impacts resulting from their cooling water intake structures. The interim mitigation period commenced on October 1, 2015, and continues up to and until owners or operators achieve final compliance with the OTC Policy.

The State Water Board approved Harbor Generating Station's continued request to comply with the interim mitigation measures described in Section 2.C(3)(b) and Section 2.C(3)(e) of the OTC Policy in the Final Determination for the October 1, 2017 to September 30, 2018 interim mitigation period (2017-2018 Final Determination). Consistent with Resolution No. 2015-0057¹ and the recommendations in the Expert Review Panel's Final Report², the interim mitigation payment is comprised of an entrainment payment, an impingement payment, and a management and monitoring payment.

In the sections below, the State Water Board has calculated Harbor Generating Station's interim mitigation payment for October 1, 2018, through September 30, 2019 (also known as the 2018-2019 determination period). This calculation is consistent with the methods and calculations applied in the 2017-2018 Final Determination.

Interim Mitigation Payment Calculation for Harbor Generation Station

Entrainment Payment Calculation

To calculate the portion of the interim mitigation payment to offset entrainment impacts, the State Water Board used the default average cost of entrainment determined in the Expert Review Panel's Final Report. Consistent with Resolution No. 2015-0057 and the Expert Review Panel's Final Report, the State Water Board used a three percent escalator to update the average cost of entrainment from the 2017-2018 Final Determination to 2019 dollars to account for inflation. The resulting average default entrainment cost for October 1, 2018, through September 30, 2019, increased from \$5.02 per million gallons (MG) to \$5.17/MG:

$$(\$5.02/\text{MG} \times 0.03) + \$5.02/\text{MG} = \$5.17/\text{MG}$$

In its February 7, 2020 letter, Los Angeles Department of Water and Power (LADWP) provided the intake volume for Harbor Generating Station for the 2018-2019 determination period of 16,375 MG. The State Water Board verified the intake volume with the data submitted in the National Pollution Discharge Elimination System permit monitoring reports for Harbor Generating Station.

To calculate the entrainment payment, the State Water Board multiplied the intake volume by the updated average default cost of entrainment:

$$\$5.17/\text{MG} \times 16,375 \text{ MG} = \$84,658.75$$

Impingement Payment Calculation

In its February 7, 2020 letter, LADWP provided the total fish impingement biomass for Harbor Generating Station for the 2018-2019 determination period totaling 7.607 pounds. The State Water Board calculated the impingement payment using the estimated total pounds of fish impinged multiplied by the average indirect economic value of the fisheries as determined in the Expert Review Panel's Final Report of \$0.80 per pound:

$$\$0.80/\text{pound} \times 7.607 \text{ pounds} = \$6.09$$

Management and Monitoring Payment Calculation

The State Water Board calculated the management and monitoring payment by taking twenty percent of the sum of the entrainment and impingement payments:

$$0.20 \times (\$84,658.75 + \$6.09) = \$16,932.97$$

State Water Board's Final Determination for Harbor Generating Station

Based on the sum of the entrainment, impingement, and management and monitoring payment calculations, the total payment to fulfill the interim mitigation obligation for LADWP's Harbor Generating Station for the interim mitigation period of October 1, 2018, to September 30, 2019, is \$101,597.81.

$$\$84,658.75 + \$6.09 + \$16,932.97 = \$101,597.81$$
