

Table 4-1. Responses to Comments

Ltr#	Cmt#	Comment	Response
2600	1	We cannot save fish with more water when the real culprits are imported competitive species.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2601	1	This is a great danger to our region and agriculture. Keep up the battle.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2602	1	The Central Valley requires water in order to produce food for CA and the nation. As the signs say, "Is Growing Food Wasting Water?" Feeding people is more important than the delta smelt. Provide water for agriculture!	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2603	1	Save farmers' water rights.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2604	1	Stop stealing water that is needed for farmers to grow crop and children to drink. If you really want to help, give the water that is heading to southern CA to the farmers.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2605	1	Stop stealing the valley's water. The valley needs to be represented on the Board, not southern CA!	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2606	1	Please save our water. We feed most of these United States of America.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2607	1	There goes agriculture. The heart of the Central Valley.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2608	1	Stop sending our water out of our area to help southern CA. They need to develop other sources like a water plant.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2609	1	We have cut back on our watering in hopes that we will have enough drinking water. Depleting our water supply is unthinkable. Our wells are going dry. Stop this madness.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2610	1	Stop the diversion, it will drain the reservoirs to make up for the diverted water.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2611	1	I oppose the State Water Board's plan to divert water from our rivers, this will cause farms' values to crash and years and years of investment into farms completely lost after generations and generations of growth.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2612	1	Not our water, you send 40%, our bills will just keep going up.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2613	1	Give our shareholders a voice in the process to update the Bay Delta Plan. The impact of this plan will affect our county for years to come. Give us a voice in finding a resolution to the problem.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2614	1	Chem trails, ionospheric heaters to push low pressure systems away from California, manipulating the jet stream, draining our rivers for dubious reasons, stop the madness. We see your end game. Not on our watch.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2615	1	Keep our economy going and the world's food supply viable.	Please see Master Response 1.1, General Comments for responses to comments that either make a general

Table 4-1. Responses to Comments

Ltr#	Cmt#	Comment	Response
			comment on the plan amendments or do not raise significant environmental issues.
2616	1	Humans over fish.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2617	1	I oppose the SWRCB wanting to take our water from our valley.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2617	2	This is the most fertile valley in the world. It not only supports and feeds this state, it feeds this country and the world. By stealing water from our valley you are intentionally destroying the State of California.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2618	1	My job depends on ag.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2619	1	Sacramento has to stop taking water from farmers that produce their food. When was the last time a smelt made a difference in your life?	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2620	1	What can we do to help save our water? Our livelihood depends on it!	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2621	1	Save our water rights!	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2622	1	Does it make sense to take water away from farmers who grow the food that feeds us? The world's population is now seven billion people and by 2100 it will be close to 11 billion people. It is like taking a suicide pill. Importing food from around the world just increases the carbon footprint. Is that the answer? There is a better way of taking care of the fish we love so much without committing suicide. Give us back our water before it is too late.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2623	1	Raise the McClure Dam and build more water storage.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2624	1	Do not take away our right to be involved in government! Allow us, as local stakeholders, to have a voice in your decisions, especially those that affect our basic needs like WATER!	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2624	2	Without total mitigation approved and provided to those affected, there should be NO WATER TAKEN AWAY!	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2625	1	The State Water Board must be a bunch of total idiots! Calling results of their proposed actions "significant but unavoidable consequences" is absolutely ignoring the facts and misstating them. They are correct saying there would be "significant" consequences and totally lying when they say those consequences are "unavoidable"! The consequences they speak of ARE TOTALLY AVOIDABLE! All they need to do is quit ignoring the people of the Central Valley (including farmers!) and quit stealing the water that is the lifeblood of the Central Valley!! If this great nation finds a way to get along without food, the plan might be a [comment cut off].	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2626	1	Leave our water for agriculture!	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.

Table 4-1. Responses to Comments

Ltr#	Cmt#	Comment	Response
2627	1	Please stop this water grab. We need to produce water storage in Southern California. We also need desalination plants in Southern California. They're right next to the ocean. Please give me a break.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2628	1	Pipe water in from other states that have too much.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2629	1	Please stop the DWR from taking this region's livelihood.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2630	1	We farmers need the water to farm and feed the people. No water, no food, no jobs!	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2631	1	Why would I agree for you to take our water? Are you not from this planet? Do you not know of the valley and how much the farmers need water? At least wait to see what the winter brings.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2632	1	Stop the flow to the ocean. All that is being accomplished is a feeble attempt to save a non-native fish and flushing of partially-treated waste water that should even be there.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2633	1	Mothballed ships at Sausalito could be used as pump platforms. Perhaps the northernmost Channel Island could put some volume of vapor aimed towards Mt. Whitney. Need favorable air currents, a volume of created vapor, sunlight and proper distance from shore to allow salt reclamation. I bet the cost of the Twin Pipeline could cover this nicely. Northern California should at least pencil this out as a strategy to get So Cal off our backs. It's like in government, revenue has value. Rain is like revenue to our environment. Our environment is up against it these days.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2634	1	The local people had riparian rights to that water for over 90 years, until politicians decided to just take them away.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2635	1	The REAL problem with the decline of Delta Smelt and salmon fry in the Sacramento Delta is the proliferation of the introduced, non-native Striped Bass, which are eating the smelt and fry into oblivion. The solution is not to take more water away from agriculture, but, rather, to pass legislation to push for the dramatic reduction in the number, if not eradication, of the Striped Bass. This can be done by an open, 12-month season, with no limit on size or number caught and in possession, and, a \$10 bounty on every Striped Bass head that is delivered to the local Agricultural Commissioner.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2636	1	I oppose the State Water Board plan. This is not good for the farmers and community.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2637	1	It's a long, overdue time to put human beings ahead of smelt, other environmental and special interest groups, and feel-good projects. Give the water back to the people.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2638	1	Instead of increased flows that, at least on the Tuolumne, have been proven to be of no real value to salmon, why doesn't the Water Board allow sale of the water-- with negotiated provision from sales to build infrastructure that actually might make a difference? It seems as though the Board wishes to destroy local dependence on our rivers, but why? What is the real goal? Is it to eventually dismantle our entire system of storage and irrigation? Because if it isn't, there are certainly better ways to aid and assist salmon, without the destruction of	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.

Table 4-1. Responses to Comments

Ltr#	Cmt#	Comment	Response
		our infrastructure and all its uses and benefits	
2639	1	No water equals no food.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2640	1	Stop this false narrative that it's about fish. It's about sending more water to Los Angeles.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2641	1	All of the parties need to work together on this. The Ag economy will be devastated and the fish goals won't be met.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2642	1	Shouldn't we all abide by water restrictions? This is what I've been calling government hypocrisy, not to mention wasting water for fracking oil, disgusting.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2643	1	I'm afraid that the Governor is all about Southern California. He couldn't care less about the valley! We lose water to the dams. Add more pumps and suck the groundwater out and kiss the valley goodbye.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2644	1	We had our deep well tested 20 years ago and the standing water level was 110 feet. Two months ago, we had the same pump standing water level tested again and it was at 140 feet (close to a 40-foot drop) had to put in two more new wells at the 800-foot level.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2645	1	To take flows back to one hundred years ago is senseless unless we take back every aspect of our lives, including the human population. Our farm has been around since the 1890s. Five generations, lots of blood sweat and tears and now you want to destroy it - shame on you thoughtless people. God help us.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2646	1	Save the humans not the smelt!	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2647	1	This is gross misappropriation of our state's water resources.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2648	1	Please do not make the mistake of releasing more water during this continuing drought.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2648	2	The State's farms, farmers, and residents have taken extraordinary measures to conserve water and reduce use waste. The State needs to do the same.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2648	3	Provide empirical evidence that more flow equals more salmon.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2649	1	Stop diverting more water from our rivers.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2649	2	Help stop sports fishing for now or until we have a normal winter rainfall.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2650	1	My future and the future of our farm and many other small farmers is quite bleak if the regulatory drought is not stopped. Quit being politicians and think sensibly for once and	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.

Table 4-1. Responses to Comments

Ltr#	Cmt#	Comment	Response
		think for the future of California agriculture.	
2651	1	Stop this crap. Why don't you regulate big companies and schools? Why do they get away with using wasting a lot of water? Don't be afraid if they give you money under the table. You are smart enough to get it from other sources.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2652	1	Keep the water in Central California for our farmers please.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2653	1	We will not let you devastate our lands in the valley and hurt our communities over fish or your desire to indulge the big cities. The big cities must deal with their problems on their own. We want no part in them.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2654	1	Please quit hurting the valley and our water needs. Our families and the world depend on the food we grow. We are dedicated to what we do and our children look forward to someday running our operations. Our futures are in the ground waiting to grow!	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2655	1	I absolutely disagree with this. This water is needed for the people of northern California to function. You want to save water...stop sending it to Los Angeles. We still have water restrictions and now the state wants to take more? Water restrictions have been lifted in many cities in the LA area but not us and their water comes from us but yet we still get punished! Absolutely ridiculous!	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2656	1	Do not touch the Delta water supply. You want to give the water to special interest, farmers with thousands of almond trees and other nut trees. Most people here in CA cannot afford those expensive nuts so they are shipping them overseas. How is that benefitting the people in CA. It's only helping a few get rich.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2657	1	Make more dames, populations rises built more dams. As what I have Notice look back in yers No dams built for population increase. Something is not right. The elites have control.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2658	1	Please let us keep our water, why not make more reservoirs. Population growth but not reservoirs?	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2659	1	I think this plan would not be in our best interest. And it is ignorant to act before you have facts on effects this may have.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2660	1	Tell Los Angeles to stop all outdoor watering they live in a desert. Then you can leave our farmers and water alone! California is and always will be a farm state. We are the breadbasket of the world.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2661	1	Stop trying to destroy the Central Valley. This is the richest agricultural valley in the world. We feed the United States and export to many other countries. We need water.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2662	1	Swimming pools in California need to be banned. Farmers need the water to grow food. They feed the United States and export to feed other countries.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2662	2	Limited water equals forced famine. What kind of evil government would do this! Ours, that's what they are proposing.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.

Table 4-1. Responses to Comments

Ltr#	Cmt#	Comment	Response
2663	1	Do not take farmers water!	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2664	1	Citizens of California who live in the Central Valley deserve a voice.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2664	2	Build and improve the dams that voters have requested. Stop this political and man made drought.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2665	1	We need our water. Our crops feed the world. Stop wasting our water. You're killing California.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2666	1	We cannot afford to have any more of the water taken away from the San Joaquin Valley. This valley grows so much food, but has so little water to do it. If more water is taken away, there will be less food grown. People will begin to see higher prices, and less quality products.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2667	1	Let's take care of ourselves then we tend the fish.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2668	1	I want to help. Food for people cannot take a backseat.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2669	1	It is about time someone starts caring about the "Big Valley". The metropolitan areas won't until there is no food on their tables!	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2670	1	Who is really behind this idea, UN or someone who just doesn't like farmers, workers, ag-related businesses, truckers, consumers, who all pay taxes, and others reap the goods they produce. I totally don't get it.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2671	1	Our Central Valley is dying! We must stop taking our water for the Bay Area/Delta plan. Unbelievable but true, my college age grandchildren's' friends in S.F. think food comes from grocery stores!	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2672	1	We are a generational farming family who would just appeal to a fair-minded, common sense approach to this issue. That hasn't been seen yet by our legislators and their irresponsible, unaccountable attitude is reckless at best, evil at worst.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2673	1	The food politicians eat comes from our valley. California is the bread basket of the world. Leave our water alone.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2674	1	Please stop sending our water to the ocean! Our ag--which is the gold of California, the state-called breadbasket of the world--is being forced out of business. No business=no jobs=no taxes to support the hoi paloi=mass migration from the state=no need for a bloated, self-important state government. On second thought, if it means we get rid of corrupt Jerry Brown and his kiss-[expletive deleted] partners in crime, yeah. Keep on doing what you're doing. You will lose in the end.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2675	1	Humans are more important than fish! Stop this manmade drought! Stop releasing rainwater to the oceans that is needed to sustain life in far more than Californians! You are	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.

Table 4-1. Responses to Comments

Ltr#	Cmt#	Comment	Response
		killing this state! Your tax base is moving away!	
2676	1	Please stop diverting water away from people and farmers who actually use it! Stop grabbing water for a salmon population that is basically non-existent. Stop playing with our water resources.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2677	1	Please make sure we are heard! Do not make this decision without our input! We live here and need our water! Do you not know we provide food for millions?	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2678	1	Work with us not against us!	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2678	2	Do not remove water from our rivers! We desperately need it for farming!	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2679	1	We are at the time of year when paying our farming bills becomes a day-by-day struggle, just received another blow with the passing of the ag overtime bill, crop numbers are coming in at all-time lows due to the water quality and quantity issues we are already experiencing, and now this--I just don't know how much longer we can take the bad news. Leave our river flows alone and turn on the pumps! We desperately need water.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2680	1	If this valley dries up, you starve!	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2681	1	If you want to eat, you'll stop sending our water elsewhere, especially to the ocean to save a fish that isn't even native to the waters!	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2682	1	We need better water storage management.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2683	1	As a small farmer in the Central Valley I implore you to reconsider moving forward with diverting any more water for our rivers that benefit salmon, steelhead, and smelt (i.e., more flows required) to the detriment of "agriculture" in the valley.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2684	1	Communities built on a desert should have their own holding tanks or reservoirs for times of drought. The city of Ceres has wells and two of these tanks built with capitol enterprise funds. Our water table has reduced because the county had no foresight in approving countless deep wells for farming in the foothills, we need our water. We need OUR water.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2685	1	The Central Valley is home to a vulnerable population which needs more than usual consideration in the Bay-Delta Plan. Mitigation measures available to more affluent parts of the state are out of reach to the great majority of valley communities and impacts to groundwater quality from the proposed water diversions disproportionately affect the poor and communities of color.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2686	1	The Water Board's proposal will devastate our region. Farms will be lost, power bills will go up, and lives will be ruined.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2686	2	We can have both healthy salmon and farms if we just work together and implement solutions for the betterment of all stakeholders. The most efficient way to accomplish this	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.

Table 4-1. Responses to Comments

Ltr#	Cmt#	Comment	Response
		goal is through local control.	
2687	1	The regulatory drought must stop. Stop diverting water from our rivers and sending it to the water wasters of southern CA.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2688	1	Don't kill the valley, its residents, its businesses, and its ability to feed the nation.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2689	1	It is pertanently [sic] devastating to all of our local farmers, workers, and families to take more water from our Central Valley, we once were the thriving bread basket of the world. Now that your agency has restricted us water, many are without work, food, and shelter. Many farms have planted less or shut down, this has been catastrophic to million [sic]. I ask that you consider all who are affected by your decision to change the water release again to us!	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2691	1	Don't take our water--we need groundwater sustainability.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2692	1	There is no evidence that taking more water from the valley families & farms will benefit the fish. There are other options.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2692	2	Stop trying to Kill Ag in California! So many people benefit around the country & world from California Ag.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2693	1	Give our water back to us and to our farmers!	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2694	1	This decision will be devastating to our community.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2695	1	My family's farms for 100 years are being affected by this.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2696	1	They are regulating my family ranch's water. Have had to dig all new wells!	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2697	1	We need to be heard. Our opinions considered.	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2698	1	Our water stays here! Our farmers feed the world--much more important than Los Angeles wasting water to have green lawns and filling pools!	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
2699	1	Stop taking our water! The Bay-Delta plan needs to be stopped immediately! We need the water for crops!	Please see Master Response 1.1, General Comments for responses to comments that either make a general comment on the plan amendments or do not raise significant environmental issues.
