Subject: Unimpeded Flow of Central California rivers

To the Water Board:

Your proposal has no scientific merit! Instead it will destroy the vibrant, innovative agriculture in the Central Valley. You are attempting to overturn a hundred years of water law solely on your power as a the water board. You will be in court for at least 20 or 30 years. You should have been using your power as the water board insuring more water storage was being built to supply the growing population in California. Why have you not supported more water storage? It is disparately needed.

Regards,

Allan James, Ph.D., CCA
