

STATE WATER RESOURCES CONTROL BOARD  
RESOLUTION NO. 81-40

AUTHORIZING NEGOTIATION AND EXECUTION OF AN AMENDMENT  
TO EXISTING CONTRACT NO. 9-069-400 WITH STANFORD RESEARCH  
INSTITUTE (SRI) FOR A STUDY OF TRACE ORGANIC CONTENT AND  
MUTAGENIC ACTIVITY OF SELECTED GROUNDWATERS

WHEREAS:

1. The use and improper disposal of toxic substances has resulted in increased findings of contamination of groundwater in the State of California.
2. The Toxic Substances Control Program Workplan calls for the initiation of a monitoring program in selected groundwater basins to provide comprehensive information on which toxic substances are most prevalent in groundwater and at what concentrations these substances are present.
3. The need exists to develop and apply state-of-the-art analytical procedures for identifying toxic substances in water and to refine these procedures for use as routine monitoring tools.
4. Results of the proposed study will assist the State Board and Regional Boards in expanding the capability of the primary network to monitor toxic substances in groundwater.

THEREFORE BE IT RESOLVED:

That the Executive Director be authorized to negotiate and execute a contract amendment to Agreement No. 9-069-400 with Stanford Research Institute for a study of trace organic content and mutagenic activity of selected groundwaters for a duration of 12 months in an amount not to exceed \$50,000.

CERTIFICATION

The undersigned, Executive Director of the State Water Resources Control Board, does hereby certify that the foregoing is a full, true, and correct copy of a resolution duly and regularly adopted at a meeting of the State Water Resources Control Board held on April 16, 1981.

  
Executive Director
