

STATE WATER RESOURCES CONTROL BOARD
RESOLUTION NO. 84-10

CERTIFYING AN AMENDMENT TO THE SOUTHERN CALIFORNIA ASSOCIATION
OF GOVERNMENTS 208 WATER QUALITY MANAGEMENT PLAN FOR THE CONTROL
OF EROSION: COMPREHENSIVE SEDIMENTATION CONTROL PLAN -
NEWPORT BAY WATERSHED

WHEREAS:

1. The Southern California Association of Governments (SCAG), as the designated 208 planning agency for the South Coast area, prepared the 1979 Areawide Waste Treatment Plan, or 208 plan, which was certified by the State Water Resources Control Board (State Board) and approved by the U. S. Environmental Protection Agency (EPA) in 1980.
2. The State Board is required by the provisions of 40 CFR 35.1523-3 to evaluate 208 plan amendments and to certify, or not certify, them as being in conformance with the evaluation criteria specified in 40 CFR 1523-2 and 35.1533-1; and to inform EPA as to its findings.
3. SCAG received two 208 grants for studies to control sedimentation of upper Newport Bay, and has now completed a "Comprehensive Sedimentation Control Plan - Newport Bay Watershed" and has submitted a 208 plan amendment to the State Board in accordance with the provisions of 40 CFR 35.1532.2.
4. The 208 plan amendment is based on a technical report prepared for SCAG, entitled "San Diego Creek Comprehensive Stormwater Sedimentation Control Plan" (May 1983), which reports the State Board has reviewed and found adequate, with the exception of the analysis of channel erosion as a source of sediment affecting Newport Bay.
5. The inadequacy of the technical report, in regard to the channel erosion analysis, is not reflected in the 208 plan amendment, and the State Board has found the 208 plan amendment to be in conformance with the criteria for certification.

THEREFORE BE IT RESOLVED:

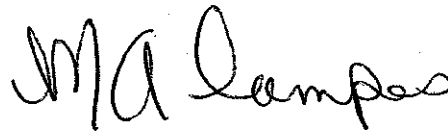

That the State Board hereby:

1. Certifies the "Comprehensive Sedimentation Control Plan - Newport Bay Watershed" SCAG 208 plan amendment.

2. Accepts the "San Diego Creek Comprehensive Stormwater Sedimentation Control Plan" technical report for the Newport Bay study, with the exception of the analysis of channel erosion as a source of sediment to Newport Bay.

CERTIFICATION

The undersigned, Executive Director of the State Water Resources Control Board, does hereby certify that the foregoing is a full, true, and correct copy of a resolution duly and regularly adopted at a meeting of the State Water Resources Control Board held on January 19, 1984.

Michael A. Campos
Executive Director
