

Call C.C. Meyers (of the Fix 50 fame) and get his bulldozers in to clean out and even deepen Folsom Lake. It is empty. There will be none of your own regulations to violate. Please, try **DOING SOMETHING** that helps this dire situation instead of issuing more and more regulations. You have the rest of the summer, but time is of the essence. Instead of thinking and saying that it can't be done, why not get to work and see what and how **THINGS CAN BE DONE?**

Vicki Murphy
