Subject: 2/2/16 BOARD MEETING (Conservation Extended Emergency Regulation)

To Whom it may concern:

I am opposed to having the 33 percent conservation requirement considered in early February. I feel it is too high due to winter weather storms we have experienced, snow in the Sierras and recurrent rain. I believe conservation requirements should be reevaluated in April when the water supply conditions are better known. We have tried hard to conserve in order to meet the goals necessitated by the drought and the lack of water infrastructure in the state but to continue excessively high conservation requirements in light of normal to above normal rain and snow if not conducive to long-term compliance.

Thank you.
