Subject: 2/2/16 board meeting

Dear Board members,
My husband and I have worked diligently to conserve water as a result of our drought crisis. We built our house and landscaped 19 years ago with saving water in mind. We have no lawn, but our 26 lot neighborhood do have lawns; yes, they are brown.

We feel the current mandate is excessive and respectfully request you to reconsider later in 2016 when the winter rains and Sierra snow pack can be used as a gauge to better determine appropriate water usage requirements for San Juan Water District customers.

Sincerely,
Jennifer Banville
