

Public Meeting on the Development of TMDLs in the Elkhorn Slough Watershed

February 19, 2015
1:00 PM – 3:00 PM

Elkhorn Slough National Estuarine Research Reserve
Administrative Building Conference Room
1700 Elkhorn Road
Royal Oaks, CA 95676

Goal

Discuss water quality concerns and the initial development of *Total Maximum Daily Loads* (TMDL) for biostimulatory substances (including nutrients) for the Elkhorn Slough Watershed (Bolsa Nueva Hydrologic Unit).

Objectives

- Provide stakeholders with background on the Central Coast Water Board's mission.
- Provide information on water quality impairments and the TMDL process.
- Provide an opportunity for discussion or comments to assist in the development of the TMDL.

Agenda

Time	Topic	Lead
1:00 – 1:10	Opening Remarks	Dave Feliz, <i>Manager Elkhorn Slough NERR</i> Jennifer Epp, <i>Central Coast Water Board</i>
