Emergency repairs from storm damage would include:

- Vegetation removal and clearing downed tree and boulder obstructions.
- Blading to remove slides and slumps.
- Grading to repair blowouts, erosion, and rutting.
- Re-compacting and reinforcing undermined roads.
- Cleaning and repairing ditches, turnouts, and spur roads.
- Re-establishing berms, water bars, side drains, and water crossings.
- Returning drain inlets and overside drains to a functional state.
- Leveling and re-compacting road surfaces to remove potholes, ruts, and other unsafe surface irregularities.
- Repairing and returning into service culverts, McCarthy drains, walls, and over-road protection features.

The Project will temporarily impact 7.38 acres of waters of the United States.
