TENTATIVE NEW WASTE DISCHARGE REQUIREMENTS

FOR

AEROJET ROCKETDYNE, INC.

WHITE ROCK NORTH DUMP AND AEROJET WASTE CONSOLIDATION UNIT  
LANDFILL

NEW CLASS II LANDFILL

CONSTRUCTION, OPERATIONS, CLOSURE, POST-CLOSURE MAINTENANCE,  
AND CORRECTIVE ACTION

SACRAMENTO COUNTY

Aerojet Rocketdyne, Inc. (Discharger) proposes to construct a new 50-acre Class II waste management unit, also known as the Aerojet Waste Consolidation Unit (AWCU) over an existing 100-acre unclassified pre-regulation municipal solid waste landfill also known as the White Rock North Dump (WRND) which is on the Discharger's property. The purpose of construction of the new AWCU is to consolidate approximately 1,000,000 cubic yards of nonhazardous waste and designated waste referred to as Transfer Material located on approximately 7,500 acres of Aerojet access-controlled property as part of their site wide clean-up efforts. The new waste discharge requirements (WDRs) Order makes findings, includes prohibitions, specifications, and provisions regulating the construction, operations, closure, post-closure maintenance, and corrective action to ensure compliance with the current laws and regulations to protect, enhance, and restore waters of the State of California.

The proposed project to construct the AWCU over the WRND requires a California Environmental Quality Act (CEQA) determination for which the California Regional Water Quality Control Board, Central Valley Region (Central Valley Water Board) acted as the Lead Agency. The Lead Agency proposes to adopt a mitigated negative declaration for the proposed project concurrent with adoption of these proposed tentative new WDRs.

The tentative new WDRs are being issued to Aerojet Rocketdyne, Inc. as the operator and landowner, also known as the discharger (Discharger) for the proposed White Rock North Dump and Aerojet Waste Consolidation Unit Landfill located at 12353 White Rock Road, Rancho Cordova.
