---

Dear Charles Reed:

I have spent many of my Environmental Health Specialist years working on the Lower Russian River Water Quality Impacts from the use of Onsite Sewage Disposal Systems. I do agree that the waters of the state have become impaired from improper placement, use, and or abuse of Onsite Wastewater Treatment Systems and other Non Point Discharges.

I only have a few comments.

- 1) If Sonoma County's PRMD Agency does not develop an approved LAMP for impaired water bodies, what steps will the Regional Board take?
- 2) What would trigger the NCRWQCB into taking actions on homeowners, if PRMD fails to do it's job?
- 3) Would the Regional Board consider a timeline for voluntary compliance? Or would there be a trigger, such as when property transfers take place, houses are being proposed to be rebuilt, etc.?

Good luck in your endeavors, you may be disappointed by the inactions of Sonoma County's PRMD.

Yours truly,

Theodore J. Walker, REHS
