Dear Members of the Water Quality Control Board,

I have just read a letter sent to you by the Hacienda Improvement Association critiquing findings in your proposal relating to water quality and guidelines on septic tanks and cesspools for properties along the Lower Russian River.

As a homeowner in this area, I support the findings of the letter sent by HIA to you. I request that you and your Board include the arguments in the HIA letter in your discussion of these important issues.

Respectfully,
Maria Mana
