Hello Mr. Reed,

As homeowners and members of the Hacienda Improvements Association I am emailing you to show my support for the recent letter sent to you on behalf of our neighbors of the HIA.

The points they have brought to our attention are well thought and of legitimate concern. We are an organized community working together and are interested in learning more about how the concerns will be addressed. Many of us are of middle to low income as well, average homeowners doing the very best to keep up financially with everything already while maintaining and improving our homes and neighborhood. Of course many of us chose to live here because of the beautiful river. We are certainly aware and concerned about the health of the river now and for generations to come.

Should a mandate come to be in the future the costs of the upgrades to our septic systems will need to be carefully planned. Education, support, grants and incentives would be imperative to successfully comply. First though we need to fully understand the facts and how the Waterboard will address the questions brought forth by the association.

Thank you for your time on the matter.

Brian Andriola  
-Member HIA
