Why do you have to make it more difficult for small business people to justify being in business. The more regulations & monetary cost you add makes it more difficult to make use of your land. Farming is Cal. best products the more cost the government insists on causing the small producer the less the will get so why be in business. I am concerning giving it up, the government will be making more than me. When are you going to start putting some sort meter on my mouth to charge for the air I breath.
