Hello my name Marene [REDACTED] I have lived here in Rialto for 30yers. I am a wife and mother. My husband and I thought we had bought a house in a city where we could raise our family. We have three living children. One which has suffered many disabilities, starting with an underactive thyroid which from that his has attention deficit hyperactivity, loss of speech and some hearing, fatigue , weakening of the immune system, reduced IQ , mental retardation and problems with motor skills and coordination some of these problems also have giving him other health problems. We have fought to keep him as well as he is, But he will always be severely handicapped from the lack of Iodine during my pregnancy. When iodine is blocked from your body as a fetus inside your mommy your metabolism doesn't develop right. My son was born in 1985 which is before

they announced that Perchlorate was found here in Rialto. In 1997 we all got letters telling us about the ground water having Perchlorate in it and they were shutting down wells with this in it.

Well it is now 2007 and still we have perchlorate in the water. Now some of Rialto is getting water from a treatment plant but other parts aren't they are still being served water with rocket fuel in it. Ten years has pass and they can't tell us that the danger is gone.

We need for you to find the companies responsible for the contaminants in the water to cleanup their mess and supply us with replacement water until all our wells have treatment plant on them.

You know they found Perchlorate on the presidents ranch, but he didn't have to wait 10 years to get it cleaned up. So why isn't our problem here in Rialto cleaned up yet? Could it be his horses are more important than human life. I sure hope not.

I am very concerned for our children and their children to com. This rocket fuel must be cleaned up and not in 6 months or a year NOW.

Thank you Marene [REDACTED] resident for 30 years.

*Marene* [REDACTED]
