

**CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD
SAN DIEGO REGION**

ADDENDUM NO. 1 TO ORDER NO. R9-2016-0069

**AN ADDENDUM TO REVISE THE DEADLINES FOR DIRECTIVES NOS. 1, 2, AND 3
OF ORDER NO. R9-2016-0069, STYLE CLEANERS, 9640 MISSION GORGE ROAD,
SANTEE, CALIFORNIA**

The California Regional Water Quality Control Board, San Diego Region (hereinafter San Diego Water Board), finds that:

1. **INVESTIGATIVE ORDER NO. R9-2016-0069.** Except as contradicted or superseded by the findings and directives set forth in this Addendum No. 1 to Investigative Order No. R9-2016-0069 (Order), all of the previous findings and directives of the Order remain in full force and effect.
2. **ADDITIONAL DATA COLLECTION IN SUPPORT OF VAPOR INTRUSION INVESTIGATION.** Directive No. 1 of the Order requires the Dischargers to submit a Soil Vapor Sampling Report of Results describing and interpreting the results of implementation of the Revised Soil Vapor Sampling Work Plan (Work Plan) by May 13, 2016. The preliminary data indicated that there was a potential for vapor intrusion at the site. In a meeting on April 14, 2016, the San Diego Water Board and the Dischargers agreed that indoor air samples should be collected to provide additional information on vapor intrusion risk. The Dischargers collected indoor air samples on May 4, 2016. Providing the Dischargers additional time beyond the May 13, 2016, due date to submit the Soil Vapor Report of Results is reasonable in light of the need to conduct the indoor air sampling, analyze the samples, interpret the results, and prepare the report.
3. **NEED FOR GROUNDWATER INVESTIGATION.** Directives Nos. 2 and 3 of the Order require the Dischargers to submit a Groundwater Investigation Work Plan to collect and analyze downgradient groundwater samples by May 13, 2016, and submit a Groundwater Investigation Report of Results by July 15, 2016. The purpose of the groundwater investigation was to provide information to answer the questions posed in Directive No. 2 of the Order regarding 1) the lateral and vertical extent of each waste constituent in groundwater downgradient of the source area and 2) the stability of the plume of each waste constituent in the downgradient direction. The groundwater investigation may no longer be needed because analytical data collected on April 1, 2016, indicate that downgradient groundwater concentrations have stabilized since the last monitoring event in 2014. The need for the Groundwater Investigation Work Plan and the Groundwater Investigation Report of Results will be reevaluated following receipt of results for the next semiannual monitoring event.

- 4. **CALIFORNIA ENVIRONMENTAL COMPLIANCE ACT.** This action is exempt from the provisions of the California Environmental Quality Act in accordance with section 15061(b)(3) of chapter 3, title 14 of the California Code of Regulations because it can be seen with certainty that there is no possibility that the activity in question will have a significant effect on the environment.

IT IS HEREBY ORDERED that, pursuant to Water Code sections 13267 and 13304, Order No. R9-2016-0069 is amended as follows:

- 1. The due date for submittal of a Soil Vapor Report of Results pursuant to Directive No. 1 of the Order is changed from **5:00 p.m. on May 13, 2016**, to **5:00 p.m. on June 27, 2016**.
- 2. The due dates for the Groundwater Investigation Work Plan (Directive No. 2) and the Groundwater Investigation Report of Results (Directive No. 3) are suspended. Pending the outcome of the second semiannual groundwater monitoring event in 2016, either new due dates will be established for these directives, or Directives Nos. 2 and 3 will be deleted from the Order in a subsequent Addendum.
- 3. Directives Nos. 2 (Groundwater Investigation Work Plan) and 3 (Groundwater Investigation Report of Results) are deleted.
- 4. Directive No. 5 is replaced with the following:
 - 5. **COMPLIANCE DATES.** For easy reference, the compliance dates for the reports required by this Order are repeated below.

Directive	Directive Requirement	Due Date
1	Soil Vapor Sampling Report of Results	June 27, 2016
2	Groundwater Investigation Work Plan	Suspended
3	Groundwater Investigation Report of Results	Suspended
4	Semiannual Groundwater Monitoring Reports	Each June 30 and December 31

An extension of due date(s) may be granted by the San Diego Water Board for good cause.

ORDERED BY

 JAMES G. SMITH
 Assistant Executive Officer
