

ERRATA SHEET FOR TENTATIVE ORDER NO. R9-2012-0026

AN ORDER MODIFYING ORDER NO. R9-2003-0123, MASTER RECLAMATION PERMIT WITH WASTE DISCHARGE REQUIREMENTS FOR THE PRODUCTION AND PURVEYANCE OF RECYCLED WATER, CITY OF SAN CLEMENTE WATER RECLAMATION PLANT ORANGE COUNTY

The following changes have been made to Tentative Order No. R9-2012-0026. The changes are shown in underline/strikeout format below:

- A. Finding No. 7 has been deleted: ~~The State Water Resources Control Board Recycled Water Policy states that the appropriate way to address salt and nutrient issues is through the development of regional or subregional salt and nutrient management plans. The development of the salt and nutrient management plans is expected to be a cooperative effort among local water and wastewater entities and local salt/nutrient contributing stakeholders. Consequently, this Order requires the City to participate in the development of a salt and nutrient management plan for the San Juan Groundwater Basin, while the South Orange County Wastewater Authority will lead the development of the salt and nutrient management plan.~~
- B. Finding No. 8 has been deleted: ~~The Regional Board adopted Resolution No. R9-2009-0125 on November 10, 2010 which endorsed the Guidelines for Salinity/Nutrient Management Planning in the San Diego Region (salt and nutrient management plan guidelines). This Order also requires the City to submit a workplan in consultation with the South Orange County Wastewater Authority within 180 days identifying proposed tasks and measures the City will implement as a stakeholder participating in development of a salt and nutrient management plan. The proposed tasks and measures to be implemented by the City must be based on the salt and nutrient management plan guidelines.~~
- C. Finding No. 9: Pursuant to the California Environmental Quality Act (CEQA), the City adopted a Mitigated Negative Declaration for the project on June 5, 2007 September 20, 2011, which supports a conclusion that the project will not have a significant impact on the environment.
- D. Requirement No. 3 (Special Provision No. 3) has been deleted: ~~In consultation with SOGWA the City shall submit a workplan within 180 days which will identify proposed tasks and measures the City will implement as a stakeholder participating in the development of a salt and nutrient management plan for the San Juan Groundwater Basin. Proposed tasks and measures to be implemented by the City must be based on the salt and nutrient management plan guidelines. Recommended tasks for development of salt and nutrient management plans can be found in Chapter 5 and Appendix A of the salt and nutrient management plan guidelines.~~
