

**Table 7.3.3-8 Required TMDL Implementation Measures for Sediment Discharges Associated with Grazing<sup>1</sup>**

Land Use Category	Performance Standards	Actions	Implementing Parties	Completion Dates
Grazing	<p><b>Surface erosion associated with livestock grazing:</b> Attain or exceed minimum residual dry matter values consistent with University of California Division of Agriculture and Natural Resources Guidelines; <b>and</b></p> <p><b>Roads:</b> Road-related sediment delivery to channels ≤ 350 cubic yards per mile per 20-year period; <b>and</b></p> <p><b>Minimize delivery of sediment to channels from unstable or potentially unstable areas:</b> Manage existing grazing operations, stock ponds, and roads to prevent additional erosion of legacy sediment delivery sites, and/or delivery from other potentially unstable areas.</p>	<p>Comply with the existing Water Board regulatory program: conditional waiver of waste discharge requirements for grazing operations in the Tomales Bay watershed (R2-2013-0039), or</p> <p>Other applicable WDRs or waiver of WDRs, or</p> <p>Submit a Report of Waste Discharge to the Water Board that provides, at a minimum, the following: description of the property; identification of site-specific erosion control measures to achieve performance standard(s) specified in this table; and a schedule for implementation of identified erosion control measures.</p>	Landowner and/or ranch operator	As required by existing regulatory program under R2-2013-0039 or other applicable WDRs or waiver of WDRs. Individual waste discharge requirements also may be issued as needed, with the schedule to be determined.
		Report progress on implementation of site-specific erosion control measures. <sup>2</sup>	Landowner and/or ranch operator	As specified in applicable WDRs or waiver of WDRs

<sup>1</sup> To achieve TMDL allocations, consistent with the State Nonpoint Source Program.

<sup>2</sup> These reports may be prepared individually or jointly or through a recognized third party.
