

# Improve your home without harming your community.

Home improvement products such as paint, fertilizers and pesticides contain toxic chemicals that can be harmful to your neighborhood and waters. Use these products sparingly and according to directions. When cleaning up after a project, make sure to dispose of them safely and properly at a local Household Hazardous Waste Collection Center or Event. To learn more ways to keep your neighborhood clean and healthy, visit [www.waterboards.ca.gov/education](http://www.waterboards.ca.gov/education).
