**Subject:** Comment Letter- Draft Construction Permit: general construction storm water permit

Dear Board Members of the State Water Resources Control Board:

I became aware of your new proposed regulation just recently and would like to express my **opposition** to the regulation. Aside from imposing onerous new requirements for managing storm water runoff on new projects, it has not been demonstrated to improve the water quality. As such this will do nothing but impose unnecessary requirements and costs without an ounce of improvement to our environment.

Good regulations I will support, but this regulation is beyond common sense for our community and California.  
Please reject this regulation.

Sincerely,

Dr. Ed Ghandour, Ph.D.
