Executive Director Designee Certification of Trash Full Capture Systems (Updated November 30, 2023)

The State Water Resources Control Board Executive Director's designee has received applications and certified the trash full capture systems (Systems) listed in the first table below, per the requirements of the Trash Provisions.¹ Legacy Systems certified pursuant to the Trash Provisions are listed in the second table below, with a certification date of December 2, 2015 (the effective date of the Trash Provisions).

Legacy Systems include those full capture systems that were listed in Appendix I of the Bay Area-wide Trash Capture Demonstration Project, Final Project Report (May 8, 2014). All Systems remain certified unless and until they are decertified by the State Water Board's Executive Director or designee. The tables below include the names of the applicants or owners of the certified Systems. The tables also include the dates of certification and, if applicable, the date of any update or decertification.

The Trash Implementation Program webpage also includes a list of decertified Systems, including the reasons for decertification.

This also serves as certification of multi-benefit trash full capture systems listed separately in the document *Certified Multi-Benefit Trash Full Capture Systems*, first certified by the Executive Director's designee on August 4, 2017. Multi-benefit trash systems shall be designed in accordance with the criteria in this document.

Only the Systems named below that are originally manufactured and/or distributed by the listed applicants or owners are certified full capture systems. Systems are either identified by their application number or, for legacy Systems, by an alpha numeric designation.

¹ Amendment to the Water Quality Control Plan for Ocean Waters of California to Control Trash (Ocean Plan) and Part 1 Trash Provisions of the Water Quality Control Plan for Inland Surface Waters, Enclosed Bays, And Estuaries of California adopted by the State Water Board located on the Statewide Water Quality Control Plans for Trash webpage at: https://www.waterboards.ca.gov/water_issues/programs/trash_control/documentation.html.
