General Description of Project

The season of diversion is from about April 1 to about November 1, of each season.

Protest

Application 10547 was protested by the Provident Irrigation District upon the grounds of possible interference with its use under prior Application 8687 which was approved for an amount of water not to exceed 40 cubic feet per second of which amount 20 cubic feet per second were to be diverted from Willow Slough at a point within the SW $\frac{1}{4}$  of NE $\frac{1}{4}$  of Section 33, T 19 N, R 2 W, M.D.B. & M., and also with its "Use of an additional 25 cubic feet per second since April 20, 1940", the basis of which right is not stated.

Stipulated Hearing

A stipulation under 12-B of The Rules and Regulations of the Division of Water Resources pertaining to Appropriation of Water in California was signed by both applicant and protestant and an informal hearing was held in the office of the Provident Irrigation District at Willows on June 10, 1943.

Protest Withdrawn

On June 11, 1943, the Division received a letter from the Provident Irrigation District stating that at the hearing it was agreed that Mr. McMahon's application be granted, subject to the usual clause protecting the Provident Irrigation District in case of shortage of water.

Conclusion

The letter of June 11 is in effect a withdrawal of the protest and it is therefore the opinion of this office that Application 10547 be approved subject to the usual terms and conditions.

ORDER
