or superiority among or between the rights of said plaintiffs in said subdivisions described.

D. It is further ordered, adjudged and decreed, that whenever the amount of water flowing in said stream does not exceed two hundred and fifty inches measured under a four inch pressure, that at such times said plaintiff L. Fink and wife shall share proportionately in the excess over said one thousand inches, according to the amounts herein decreed to be used by them, it being hereby decreed that

there is no priority of right between said last named defendants.

F. It is further ordered, adjudged and decreed, that the several amounts of water hereinbefore decreed to be owned by the various and respective plaintiffs are to be measured at their several points of diversion from said creek, and for the purpose of determining whether or not there is at any time flowing in said stream any water in excess of the aggregate amounts owned by the plaintiffs, namely, One thousand inches, measured under a four inch pressure, that a concrete measuring device or wier is to be constructed and placed in the channel of said creek, at or near the point of diversion of plaintiff L. E. McCulley, which said measuring device is to be so constructed and so marked that any of the parties hereto can determine therefrom whether or not there is any water in excess of said one thousand inches flowing in said stream, and if so what amount of excess there is so flowing. Said measuring device is to be constructed at the joint expense of all of the parties hereto, said cost to be borne and paid by the parties hereto pro rata according to the amounts of water owned by them and is to be constructed under the supervision of some competent irrigation engineer to be selected by the parties hereto and the expense of such engineer to be a part of the cost of said device.

G. It is further ordered, adjudged and decreed, that the points of diversion of some of the plaintiffs herein are located at a considerable distance below the point of diversion of said L. E. McCulley, where said measuring device is to be placed, and that there is an appreciable loss of water by seepage and evaporation between said points, and the points of diversion of said defendants are above the points of diversion of some of said plaintiffs, and therefore for the purpose of determining what amount of water must be flowing in said stream at the point where said measuring device is placed to allow each and all of the plaintiffs to receive at their respective points of diversion the amounts herein decreed to them, and at the same time for the defendants to be able to determine whether or not there was flowing in said stream any water to which they are entitled, in accordance with said stipulation and agreement it is hereby ordered,

adjudged and decreed, that such loss of water between said measuring device and said lower points of diversion shall be estimated and determined during the spring of 1923, by the State Water Commission of the State of California, or by its representative or engineer, upon the visit of said engineer to said Cedar Creek, during said spring of 1923, and that such determination shall be filed in this action and shall be conclusive upon all of the parties hereto on said question of loss, and said lower divertors rights shall be increased at the point of said measuring device the amount found by said engineer to be necessary to deliver to their respective points of diversion the several amounts herein before decreed to be owned by them, and the rights of said defendants shall not attach to any water in said stream unless there is flowing therein at the said measuring device, the full amounts to which said plaintiffs are entitled, plus the amounts so found by said engineer to be necessary to cover said loss, and an excess over these amounts, and then said defendants shall be entitled to the said excess.

H. It is further ordered, adjudged and decreed, that whenever there is flowing in said stream any water in excess of the aggregate amounts hereinbefore decreed to said plaintiffs and said defendants, that such excess water over and above the necessary amount to supply all of said plaintiffs and defendants the rights hereinbefore decreed to be owned by them, shall be owned and diverted and used, by the said plaintiffs and defendants jointly, pro rata according to their several rights hereinbefore set forth.

I. It is further ordered, adjudged and decreed, between the plaintiffs T. B. Sizer and John Weber, and the defendants Robert O. Fink and wife, that said defendant shall have the right to divert any water that he may be entitled to hereinafter through the same ditch now used by him to divert from the channel of said Cedar Creek, water heretofore conveyed from Jones Creek into Cedar Creek, and carried down the channel of said Cedar Creek, to the point of diversion of said ditch, which is located in the southeast corner of the northeast quarter of the northeast quarter of Section 8, township 42 North, Range 18 East, M.D.M., AND said last named plaintiffs shall not in any way obstruct, impede or interfere with

said last named defendants in the use of said ditch, and shall not obstruct or interfere with the free flow of any water which said defendants may be entitled to under this decree, through said ditch, to the said defendants.

J. It is further ordered, adjudged and decreed, that some of the parties plaintiff and defendant herein have heretofore been diverting water from Toms Creek into the channel of Cedar Creek, and conveying such water down the natural channel of Cedar Creek to their points of diversion from said Cedar Creek and there reclaiming said Toms Creek water and diverting the same from said Cedar Creek, under a claim of right, and said parties still claim the right to so divert the waters of said Toms Creek, into said Cedar Creek and convey the same down the channel of said Cedar Creek to their points of diversion and there to divert said water, and it is hereby ordered, adjudged and decreed that this decree shall in no way change or alter the said rights of said parties so claiming said Toms Creek water, and this decree is not intended to embrace or have any effect on the waters of said Toms Creek so turned into said Cedar Creek, but is only intended to deal with and decree the respective rights of the parties hereto in and to the water of Cedar Creek and the natural flow thereof, and said parties so claiming rights to the waters of said Toms Creek shall not be restricted or restrained in any manner from turning said Toms Creek water into the channel of Cedar Creek, and reclaiming said Toms Creek water at their several points of diversion from Cedar Creek.

K. It is further ordered, adjudged and decreed, that this decree covers all the rights, of every kind and character of each and all of the parties hereto, and said parties hereto have no other, further or different rights in the waters of said Cedar Creek and no other further or different rights belonging to the lands of the parties hereto, than the rights hereinbefore adjudged and decreed to them.

L. It is further ordered, adjudged and decreed, that each and all of the parties plaintiff and defendant herein, their and each of their agents, attorneys, employees, successors, and assigns, are hereby perpetually enjoined and restrained from in any manner violating this decree, or from interfering with, obstructing or impeding any or all of the other parties herein in their diversion and use of the respective quantities of the waters of said Cedar Creek, in the manner and at the times herein decreed.

M. It is further ordered, adjudged and decreed that each of the parties hereto pay his or her own costs herein incurred.

Done in open Court this 18th day of February, 1923.
