SACRAMENTO

Ms. Victoria A. Whitney
Chief, Division of Water Rights
State Water Resources Control Board
P.O. Box 2000
Sacramento, California 95812-2000

Subject: Application for Temporary Urgency Permit, Friant Division, Central Valley Project, California

Dear Ms. Whitney:

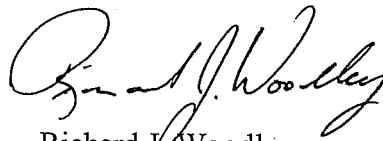

Enclosed please find an application for a temporary urgency permit to appropriate water. This application is being filed by the Bureau of Reclamation pursuant to California Water Code Section 1425 et seq. This year, the San Joaquin River Basin produced a record low water supply runoff, resulting in a historically low water allocation of 60 percent of Class 1 dependable contract supply within the Friant Division of the Central Valley Project. Also as result of this year's hydrology, the Mammoth Pool Operating Agreement requires that the operating agency upstream of Millerton Reservoir, Southern California Edison (SCE), have an end-of-month storage of 152,500 acre-feet by September 30, 2007, thereby requiring SCE to release water. Reclamation would like to divert these upstream releases to storage during the period of August 1 through November 1 due to the fact that the conservation of storage at Millerton Lake is of significant importance this year.

Reclamation has included, with this application, pursuant to California Public Resources Code Section 10005, a check (No. 119) in the amount of \$850.00, payable to the Department of Fish and Game. Reclamation understands that the administrative filing fee required to process its application is covered by the water right fees program to the extent that sufficient funds are available. Any administrative costs incurred as a result of processing Reclamation's application that exceed the funds available, under the water right fees program, will be covered under the existing contract between Reclamation and the Board for services rendered by Board staff.

7-30-07
\$850.00
TF

If you have any questions or would like further information, please contact Mr. Bob Colella, Water Rights Specialist, at 916-978-5256.

Sincerely,

A handwritten signature in black ink, appearing to read "Richard J. Woodley". The signature is fluid and cursive, with the first name being the most prominent.

Richard J. Woodley
Regional Resources Manager

APPLICATION NO. _____
(leave blank)

TEMPORARY URGENCY **APPLICATION TO APPROPRIATE WATER**

SECTION A: NOTICE INFORMATION

1. APPLICANT/AGENT

a.

	APPLICANT	ASSIGNED AGENT (if any)
Name	U.S. Bureau of Reclamation	
	Mid-Pacific Region	
Mailing Address	2800 Cottage Way	
City, State & Zip	Sacramento, CA 95825	
Telephone	916-978-5200	
Fax		
E-mail		

2. OWNERSHIP INFORMATION (Please check type of ownership.)

- Sole Owner Limited Liability Company (LLC) General Partnership*
 Limited Partnership* Business Trust Husband/Wife Co-Ownership
 Corporation Joint Venture Other Federal Government
- *Please provide a copy of your partnership agreement.

3. PROJECT DESCRIPTION (Provide a detailed description of your project, including, but not limited to, type of construction activity, area to be graded or excavated, and how the water will be used.)

For continuation, see Attachment No. 1

4. PURPOSE OF USE, DIVERSION/STORAGE AMOUNT AND SEASON

a. PURPOSE OF USE (irrigation, domestic, etc.)	DIRECT DIVERSION				STORAGE		
	AMOUNT		SEASON OF DIVERSION		AMOUNT	SEASON OF COLLECTION	
	Rate (cfs or gpd)*	Acre-feet per year	Beginning date (month & day)	Ending date (month & day)	Acre-feet per year	Beginning date (month & day)	Ending date (month & day)

See Attachment No. 1 * If rate is less than 0.025 cubic feet per second (cfs), use gallons per day (gpd).

- b. Total combined amount taken by direct diversion and storage during any one year will be 35,000 acre-feet.
- c. Reservoir storage is: onstream offstream underground (If underground storage, attach Form APP-UGSTOR.)
- d. County in which diversion is located: Madera, Fresno County in which water will be used: See 7
- e. Assessor's Parcel Number(s): _____

5. SOURCES AND POINTS OF DIVERSION/REDIVERSION

- a. Sources and Points of Diversion (POD)/Points of Rediversion (PORD):
- POD / PORD # ___: _____ tributary to _____
thence _____
- POD / PORD # ___: _____ tributary to _____
thence _____
- POD / PORD # ___: _____ tributary to _____
thence _____
- POD / PORD # ___: _____ tributary to _____
thence _____

See Attachment No. 1

b. State Planar and Public Land Survey Coordinate Description:

POD/ PORD #	CALIFORNIA COORDINATES (NAD 27)	ZONE	POINT IS WITHIN (40-acre subdivision)	SECTION	TOWN -SHIP	RANGE	BASE AND MERIDIAN
			¼ of ¼				
			¼ of ¼				
			¼ of ¼				
			¼ of ¼				

See Attachment No. 1

c. Name of the post office most often used by those living near the proposed point(s) of diversion:

Friant, CA

6. WATER AVAILABILITY

a. Have you attached a water availability analysis for this project? YES NO

If NO, provide sufficient information to demonstrate that there is reasonable likelihood that unappropriated water is available for the proposed appropriation:

See Attachment No. 1

b. Is your project located on a stream system declared to be fully appropriated by the State Water Resources Control Board during your proposed season of diversion? YES NO

c. In an average year, does the stream dry up at any point downstream of your project? YES NO If YES, during which months? Jan Feb Mar Apr May Jun Jul Aug Sep Oct Nov Dec

d. What alternate sources of water are available if a portion of your requested diversion season must be excluded because water is not available for appropriation? (e.g., percolating groundwater, purchased water, etc.)

See Attachment No. 1

7. PLACE OF USE

USE IS WITHIN (40-acre subdivision)	SECTION*	TOWNSHIP	RANGE	BASE & MERIDIAN	IF IRRIGATED

*Please indicate if section is projected with a "(P)" following the section number.

See Attachment No. 1

8. PROJECT SCHEDULE N/A. No new construction is involved for this project.

a. Project is:

proposed. Year construction will begin: _____

partially complete. Extent of completion: _____

complete. Year completed: _____

b. Year of first use: _____ Year water will be used to the full extent intended: _____

SECTION B: MISCELLANEOUS DIVERSION INFORMATION

1. JUSTIFICATION OF AMOUNTS REQUESTED

a. IRRIGATION: Maximum area to be irrigated in any one year: _____ acres.

CROP	ACRES	METHOD OF IRRIGATION (sprinklers, flooding, etc.)	WATER USE (Acre-feet/Yr.)	SEASON OF WATER USE	
				Beginning date (month & day)	Ending date (month & day)

See Attachment No. 1

b. DOMESTIC: Number of residences to be served: _____ Separately owned? YES NO See Atch No. 1
 Number of people to be served: _____ Estimated daily use per person is: _____ gallons per day
 Area of domestic lawns and gardens: _____ square feet
 Incidental domestic uses: _____
 (dust control area, number and kind of domestic animals, etc.)

c. STOCKWATERING: Kind of stock: _____ Maximum number: _____
 Describe type of operation: _____
 (feedlot, dairy, range, etc.)

d. RECREATIONAL: Type of recreation: Fishing Swimming Boating Other _____

e. MUNICIPAL:

POPULATION		MAXIMUM MONTH		ANNUAL USE		
List for 5-year periods until use is completed		Average daily use	Rate of diversion	Average daily use	Acre-foot	Total
Period	Population	(gallons per capita)	(cfs)	(gallons per capita)	(per capita)	(acre-feet)
Present						

See Attachment No. 1

Month of maximum use during year: July Month of minimum use during year: January

f. HEAT CONTROL: Area to be heat controlled: _____ net acres
 Type of crops protected: _____
 Rate at which water is applied to use: _____ gpm per acre
 Heat protection season will begin _____ and end _____
 (month & day) (month & day)

g. FROST PROTECTION: Area to be frost protected: _____ net acres
 Type of crops protected: _____
 Rate at which water is applied to use: _____ gpm per acre
 The frost protection season will begin _____ and end _____
 (month & day) (month & day)

h. INDUSTRIAL: Type of industry: _____
 Basis for determination of amount of water needed: _____

i. MINING: Name of the claim: _____ Patented Unpatented
 Nature of the mine: _____ Mineral(s) to be mined: _____
 Type of milling or processing: _____
 After use, the water will be discharged into _____ (watercourse)
 in _____ ¼ of _____ ¼ of Section _____, T _____, R _____, B. & M.

j. POWER: Total head to be utilized: _____ feet
 Maximum flow through the penstock: _____ cfs
 Maximum theoretical horsepower capable of being generated by the works (cfs x fall + 8.8): _____
 Electrical capacity (hp x 0.746 x efficiency): _____ kilowatts at: _____ % efficiency
 After use, the water will be discharged into _____ (watercourse)
 in _____ ¼ of _____ ¼ of Section _____, T _____, R _____, B. & M. FERC No.: _____

k. FISH AND WILDLIFE PRESERVATION AND/OR ENHANCEMENT: List specific species and habitat type that will be preserved or enhanced in Item 7a of Section C.

l. OTHER: Describe use: _____
 Basis for determination of amount of water needed: _____

2. DIVERSION AND DISTRIBUTION METHOD

a. Diversion will be by gravity by means of: Pipe through dam
(dam, pipe in unobstructed channel, pipe through dam, siphon, weir, gate, etc.)

b. Diversion will be by pumping from: _____
(sump, offset well, channel, reservoir, etc)
 Pump discharge rate: _____ cfs or gpd Horsepower: _____ Pump Efficiency: _____

c. Conduit from diversion point to first lateral or to offstream storage reservoir:

CONDUIT (pipe or channel)	MATERIAL (type of pipe or channel lining; indicate if pipe is buried or not)	CROSS-SECTION (pipe diameter, or ditch depth and top and bottom width) (inches or feet)	LENGTH (feet)	TOTAL LIFT OR FALL		CAPACITY (cfs, gpd or gpm)
				feet	+ or -	

See Attachment No. _____

d. Storage reservoirs: (For underground storage, complete and attach form APP-UGSTOR)

RESERVOIR NAME OR NUMBER	DAM				RESERVOIR		
	Vertical height from downstream toe of slope to spillway level (feet)	Construction material	Length (feet)	Freeboard: dam height above spillway crest (feet)	Surface area when full (acres)	Capacity (acre-feet)	Maximum water depth (feet)
Friant	293	Concrete	3488	7	4,900	520,600	270

See Attachment No. _____

e. Outlet pipe: Complete for storage reservoirs having a capacity of 10 acre-feet or more.

RESERVOIR NAME OR NUMBER	OUTLET PIPE				
	Diameter (inches)	Length (feet)	Fall: vertical distance between entrance and exit of outlet pipe (feet)	Head: vertical distance from spillway to entrance of outlet pipe (feet)	Dead Storage: storage below entrance of outlet pipe (acre-feet)
Friant	110 (4)	200	50	198	17,400

See Attachment No. _____

f. If water will be stored and the reservoir is not at the point of diversion, the maximum rate of diversion to offstream storage will be _____ cfs. Diversion to offstream storage will be made by: Pumping Gravity

3. CONSERVATION AND MONITORING See atch No. 1.

a. What methods will you use to conserve water? Explain. _____

b. How will you monitor your diversion to be sure you are within the limits of your water right and you are not wasting water? Weir Meter Periodic sampling Other (describe) _____

4. RIGHT OF ACCESS

a. Does the applicant own all the land where the water will be diverted, transported and used? YES NO
 If NO, I do do not have a recorded easement or written authorization allowing me access.

b. List the names and mailing addresses of all affected landowners and state what steps are being taken to obtain access: N/A

See Attachment No. 1

5. EXISTING WATER RIGHTS AND RELATED FILINGS

a. Do you claim an existing right for the use of all or part of the water sought by this application? YES NO
 If YES, please specify: Riparian Pre-1914 Registration Permit License
 Percolating groundwater Adjudicated Other (specify) _____

b. For each existing right claimed, state the source, year of first use, purpose, season and location of the point of diversion (to within quarter-quarter section). Include number of registration, permit, license, or statement of

water diversion and use, if applicable. _____

c. List any related applications, registrations, permits, or licenses located in the proposed place of use or that utilize the same point(s) of diversion? _____

See Attachment No. 1

6. OTHER SOURCES OF WATER

Are you presently using, or do you intend to use, purchased water or water supplied by contract in connection with this project? Yes No If yes, please explain: _____

7. MAP REQUIREMENTS

The Division cannot process your application without accurate information showing the source of water and location of water use. You must include a map with this application form that clearly indicates the township, range, section and quarter/quarter section of (1) the proposed points of diversion and (2) the place of use. A copy of a U.S.G.S. quadrangle/topographic map of your project area is preferred, and can be obtained from sporting goods stores or through the Internet at <http://topomaps.usgs.gov>. A certified engineering map is required when (1) appropriating more than three cfs by direct diversion, (2) constructing a dam which will be under the jurisdiction of the Division of Safety of Dams, (3) creating a reservoir with a surface area in excess of ten acres or (4) appropriating more than 1000 acre-feet per annum by underground storage. See the instruction booklet for more information.

See Attachment No. 1

SECTION C: ENVIRONMENTAL INFORMATION

Note: Before a water right permit may be issued for your project, the State Water Resources Control Board (SWRCB) must consider the information contained in an environmental document prepared in compliance with the California Environmental Quality Act (CEQA). This form is not a CEQA document. If a CEQA document has not yet been prepared for your project, a determination must be made of who is responsible for its preparation. If the SWRCB is determined to be responsible for preparing the CEQA document, the applicant will be required to pay all costs associated with the environmental evaluation and preparation of the required documents. Please answer the following questions to the best of your ability and submit with this application any studies that have been conducted regarding the environmental evaluation of your project.

1. COUNTY PERMITS No new construction is involved.

a. Contact your county planning or public works department and provide the following information:

Person contacted: N/A Date of contact: _____

Department: _____ Telephone: (____) _____

County Zoning Designation: _____

Are any county permits required for your project? YES NO If YES, check appropriate box below:

Grading permit Use permit Watercourse Obstruction permit Change of zoning

General plan change Other (explain): _____

b. Have you obtained any of the required permits described above? YES NO

If YES, provide a complete copy of each permit obtained.

See Attachment No. _____

2. STATE/FEDERAL PERMITS AND REQUIREMENTS N/A

a. Check any additional state or federal permits required for your project:

Federal Energy Regulatory Commission U.S. Forest Service U.S. Bureau of Land Management

U.S. Corps of Engineers U.S. Natural Res. Conservation Service Calif. Dept. of Fish and Game

State Lands Commission Calif. Dept. of Water Resources (Div. of Safety of Dams)

Calif. Coastal Commission State Reclamation Board Other (specify) _____

b. For each agency from which a permit is required, provide the following information:

AGENCY	PERMIT TYPE	PERSON(S) CONTACTED	CONTACT DATE	TELEPHONE NO.

See Attachment No. _____

- c. Does your proposed project involve any construction or grading-related activity that has significantly altered or would significantly alter the bed, bank, or riparian habitat of any stream or lake? YES NO
If YES, explain: _____

See Attachment No. _____

- d. Have you contacted the California Department of Fish and Game concerning your project? YES NO
If YES, name and telephone number of contact: Julie Mean, 559-243-4005

3. ENVIRONMENTAL DOCUMENTS

- a. Has any California public agency prepared an environmental document for your project? YES NO
c. If YES, submit a copy of the latest environmental document(s) prepared, including a copy of the notice of determination adopted by the California public agency. Public agency: _____
d. If NO, check the appropriate box and explain below, if necessary:
 The applicant is a California public agency and will be preparing the environmental document.*
 I expect that the SWRCB will be preparing the environmental document.**
 I expect that a California public agency other than the State Water Resources Control Board will be preparing the environmental document.* Public agency: _____
 See Attachment No. _____

* **Note:** When completed, submit a copy of the final environmental document (including notice of determination) or notice of exemption to the SWRCB, Division of Water Rights. Processing of your application cannot proceed until these documents are submitted.

** **Note:** CEQA requires that the SWRCB, as Lead Agency, prepare the environmental document. The information contained in the environmental document must be developed by the applicant and at the applicant's expense under the direction of the SWRCB, Division of Water Rights.

4. WASTE/WASTEWATER

- a. Will your project, during construction or operation, (1) generate waste or wastewater containing such things as sewage, industrial chemicals, metals, or agricultural chemicals, or (2) cause erosion, turbidity or sedimentation?
 YES NO
If YES, or you are unsure of your answer, explain below and contact your local Regional Water Quality Control Board for the following information (See instruction booklet for address and telephone no.):

See Attachment No. 1

- b. Will a waste discharge permit be required for your project? YES NO
Person contacted: _____ Date of contact: _____
c. What method of treatment and disposal will be used? _____

See Attachment No. 1

5. ARCHEOLOGY

- a. Have any archeological reports been prepared on this project? YES NO
b. Will you be preparing an archeological report to satisfy another public agency? YES NO
c. Do you know of any archeological or historic sites located within the general project area? YES NO
If YES, explain: _____

See Attachment No. 1

6. ENVIRONMENTAL SETTING

Attach **three complete sets of color photographs**, clearly dated and labeled, showing the vegetation that exists at the following three locations:

- Along the stream channel immediately downstream from the proposed point(s) of diversion.
 Along the stream channel immediately upstream from the proposed point(s) of diversion.
 At the place(s) where the water is to be used.

See Attachment No. 1

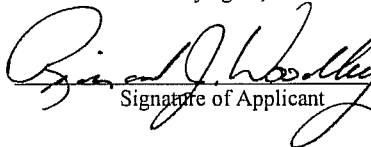

SECTION D: SUBMITTAL FEES

Calculate your application filing fee using the "Water Right Fee Schedule Summary" that was enclosed in the application packet. The "Water Right Fee Schedule Summary" can also be viewed at the Division of Water Rights' website (www.waterrights.ca.gov).

A check for the application filing fee, payable to the "Division of Water Rights" and an \$850 check for the environmental review fee, payable to the "California Department of Fish and Game," must accompany this application. All applicable fees are required at the time of filing. Your application will be returned to you if it is not accompanied by all required fees.

SECTION E: DECLARATION AND SIGNATURE

I declare under penalty of perjury that all information provided is true and correct to the best of my knowledge and belief. I authorize my agent, if I have designated one above, to act on my behalf regarding this water right application.

	REG. RESOURCES AGENT	7/20/2007
Signature of Applicant	Title or Relationship	Date

Signature of Co-Applicant (if any)	Title or Relationship	Date

"APPLICATION TO APPROPRIATE WATER" CHECKLIST

Before you submit your application, be sure to:

- Answer each question completely in Sections A, B, and C.
- Number and include all necessary attachments.
- Include a legible map that meets the requirements discussed in the instruction booklet (Item B6).
- Include the Water Availability Analysis or sufficient information to demonstrate that there is reasonable likelihood that unappropriated water is available for the proposed appropriation (Item A6).
- Include three complete sets of color photographs of the project site (Item C6).
- Enclose a check for the required fee, payable to the Division of Water Rights, as specified in Section D.
- Enclose a \$850 check for the environmental review fee, payable to the Department of Fish and Game, as specified in Section D.
- Sign and date the application in Section E.

Send the original and one copy of the entire application to:

State Water Resources Control Board
Division of Water Rights
P.O. Box 2000
Sacramento, CA 95812-2000

Section A: Notice Information

3. Project Description

Diversions to storage will be made at existing structure (Friant Dam). No new facilities will be constructed. Water will be used within service areas of existing water contractors and within existing places of use for Friant Division Central Valley Project (CVP) Permits.

This year, the San Joaquin River Basin produced a record low water supply runoff, resulting in a historically low water allocation of 60% Class 1 dependable contract supply within the Friant Division of the CVP. Current water conditions are such that, after a year with approximately 60% of average precipitation and 39% of normal unimpaired snowmelt runoff, Millerton Lake is at 69% of average storage for this time of year and is at 53% of capacity. Forecasts for the San Joaquin Valley Water Year Type Index have indicated a Critical year type. As a result, Reclamation has a relatively short water delivery time period and a low water demand during the period of August through November, 2007, as most water districts served from the Friant Division will be done with their water deliveries by September. The Mammoth Pool Operating Agreement September 30 Storage Constraint requires that the operating agency upstream of Millerton Reservoir, Southern California Edison (SCE), have an end-of-month storage of 152,500 acre-feet by September 30 when the April to July computed natural runoff at Friant Dam is less than or equal to 650,000 acre-feet. As a result of this year's hydrology, SCE is required to release water at the Mammoth Pool, thereby causing an increase in the elevation of Millerton Lake. Reclamation would like to divert these upstream releases to storage at Friant Dam during the period of August 1 through November 1 due to the fact that the conservation of storage is of significant importance this year. Reclamation estimates that about 35,000 acre-feet of water will be available for collection during this time period due to the required Mammoth Pool releases.

4. Purpose of Use, Diversion/Storage Amount and Season

Proposed Purposes of Use: Irrigation, Municipal, Domestic, Incidental Domestic, Recreation

Storage Amount: 35,000 acre-feet

Storage Season: Collection to storage beginning 8/1 and ending 11/1

5. Sources and Points of Diversion/Rediversion

a. Sources and Points of Diversion (POD)/Points of Rediversion (PORD)

POD/PORD #1: San Joaquin River, Tributary to Suisun Bay

b. Coordinate Description

Attachment No. 1 to Temporary Urgency Application of USBR

Points of diversion and rediversion are at Friant Dam. The points of diversion and rediversion are the same as on file with the State Water Resources Control Board (SWRCB) for Applications 234, 1465, and 5638.

Friant Dam: North 39° 30' West 2,200 feet from S¼ corner of Section 5, T11S, R21E, M.D.B.&M, being within the NW¼ of SW¼ of Section 5, T11S, R21E, M.D.B.&M.

6. Water Availability

See project description in Paragraph 3, above.

d. Exclusion of portion of requested temporary diversion season would result in lost opportunity to store flows released by SCE.

7. Place of Use

See map numbers 214-212-37 and 214-212-3331, on file with the SWRCB, for Application 5638 and for Applications 234 and 1465, respectively, for place of use. Place of use also includes place of use shown on map number 1785-202-14 on file with the SWRCB for Application 5638.

Section B: Miscellaneous Diversion Information

1. Justification of Amounts Requested

a. Irrigation: Area to be irrigated is within the service areas of water districts within the gross place of use shown on map number 214-212-37 and map number 214-212-3331, on file with the SWRCB.

b. Domestic and Incidental Domestic: Water will be used in service areas of water districts within the place of use shown on map number 214-212-37 and map number 214-212-3331, on file with the SWRCB.

e. Municipal: Water will be used in service areas of water districts and municipalities within the place of use shown on map number 214-212-37 and map number 1785-202-14, on file with the SWRCB.

3. Conservation and Monitoring

Pursuant to section 210 of the Reclamation Reform Act of 1982, every water district that has entered into a water service contract with Reclamation for CVP water service shall develop a water conservation plan which shall contain definite goals, appropriate water conservation measures, and a time table for meeting the water conservation objectives. In accordance with the terms and conditions of the Friant Division water service contracts, water contractors are required to implement an effective water conservation and efficiency program based on each contractor's water conservation plan that has been determined by Reclamation to meet the

Attachment No. 1 to Temporary Urgency Application of USBR

conservation and efficiency criteria for evaluating water conservation plans established under Federal law. Contractors are required to submit to Reclamation a report on the status of implementation of the water conservation plan. At five-year intervals, contractors are required to revise each water conservation plan to reflect the then current conservation and efficiency criteria for evaluating water conservation plans established under Federal law.

4. Right of Access

Existing ownership and access for operation of the Friant Division of the CVP are in place. Water will continue to be used by various water districts and municipalities by means of contractual arrangements.

5. Existing Water Rights and Related Filings

c. Related Applications: Apps. 23, 234, 1465, and 5638, for operation of the Friant Division of the CVP.

7. Map Requirements

See map numbers 214-212-37, 214-212-3331, and 1785-202-14, on file with the SWRCB, for place of use. Also see Map Number 214-212-46, on file with the SWRCB, for Friant Dam and Reservoir area.

Section C: Environmental Information

4. Waste/Wastewater

The generation of wastewater from within contractors' service areas would be an issue between the water service contractor and the Regional Water Quality Control Board RWQCB. Operation of Friant Dam by Reclamation to temporarily divert water to storage during the requested diversion season would not directly result in wastewater. Point of contact at the Central Valley RWQCB is Lonnie Wass, 559-445-5116.

5. Archaeology

There are cultural resources located within the reservoir pool of Millerton Lake, but the proposed action to retain an additional 35,000 acre-feet of water in Millerton Lake has no potential to affect historic properties. Millerton Lake has filled and drained for more than 60 years since its completion and the retention of this water mimics the natural cycle.

6. Environmental Setting

There will be no new construction, no deliveries to any lands not presently within the Friant Division place of use, and no inundation of any new lands. See information on file with the SWRCB concerning Applications 234, 1465, and 5638.
