

Dear Ms. Townsend,

It has come to my attention that State Water Board released a new plan to increase river flows in the Tuolumne, Stanislaus, and Merced Rivers by 30-50% of the unimpaired flow level during February to June.

I want to commend the Board on this decision. The enhanced flows and temperature will improve the environment for the fish and wild life that depend on it, as well as the quality of the water for all.

Thank you for this longview change,

Susan Reichle
