Your <<Interested Party>> *IP-Notice Only* contains a term (Standard Term 91) that prohibits diversion of water under specified conditions. These conditions occur when stored water (supplemental Project water) from the Central Valley Project operated by the U.S. Bureau of Reclamation or the State Water Project operated by the California Department of Water Resources is being released to meet water quality standards and other inbasin entitlements in the Sacramento-San Joaquin Delta Watershed. The State Water Resources Control Board is giving this advance notice to advise affected diverters on the probability of a water diversion curtailment.

Based on projected water and weather conditions, you may not be able to divert water under <<Interested Party>> *IP-Notice Only* beginning March 1st 2014 until notified of an end date.

Note: Curtailment period can change based on up-to-date information.

You will be sent a Notice of Curtailment of Water Diversion by certified mail when the water diversion curtailment period actually begins. If you plan to use water during the water diversion curtailment period, you must arrange to obtain an alternate source of water such as ground water or contract (purchased) water from agencies that have available water.

If you have any questions concerning this notice, please call Christine Rico of the Delta Watermaster staff at (916) 445-5961 christine.rico@waterboards.ca.gov.

Sincerely,

A handwritten signature in black ink, appearing to read "Craig M. Wilson".
