RE: Water users in compliance should not be penalized
but rewarded

Dear Chairperson Marcus and Board,

Since November 2014 my DWP bill shows that I cut my water usage from 6 HCF to 4 HCF monthly and that 50 gallons a day continues to the present.

I cannot cut back another 16% as determined for Los Angeles.

Please address NOT penalizing us - people like me who already are at our minimum usage.

Please focus on those who need to begin to cut back.

I am fearful that you and DWP will penalize me and those like me who long ago responded to the call. Rather, you should reward us for being sensitive - months ago.

Only penalize those individuals and households who overuse water resources

Please don't make me pay for others' misuse.

Thank you for your attention to this matter at your meetings.
