

I urge the water resources board to give some discretionary power to urban water providers so that they may consider whether exceptions might be given to users whose water bills demonstrate that the user already cut back the required amount from use in 2011 and 2012; for example, my use went far down in 2013 because I was educated enough to begin conserving. My use has been far below the average in my community since the beginning of 2013. If I must cut back another 25%, I will be unable to take showers. I am employed and must be clean for work every day.

Thank you,.
Bonnie Maly
