

As a Resident of the City of Rolling Hills on the Palos Verdes Peninsula, I'm told I may be expected to reduce my water consumption by 35%.

This is a letter of my "official objection".....

My property of 2+ acres requires a considerable use of water - a reduction of 35% would be devastating.

Furthermore, I have 5 hard -orking performance show horses on my property - they each consume approximately 20 gallons each of water, daily. Reducing my water allotment by 35% would cause serious health problems for my horses.
