Comments:

Thank you for the opportunity to comment on the Emergency Regulations for Statewide Urban Water Conservation. I urge the State Board to adopt the modifications to the existing emergency regulation to allow water agencies to achieve state water-use targets through a combination of conservation and sustainable drinking water supplies, such as desalination, potable reuse, and long-term transfers of conserved water. The State Board has a unique opportunity to incentivize the development of sustainable water supplies -- not only for this drought -- but to better prepare California for future droughts. San Diego water districts have already paid for some of the mitigation for the drought conditions, especially through the new desalination plant in Carlsbad, and the state should be facilitating ways to make more desal plants to come on line and work with the health departments to facilitate more purple pipes with recycled water for our landscaping.  
Thank you.
