

*Dear Water board, Please don't increase the water exports out of the Tuolumne, Stanislaus & Merced rivers. this porposed action has the potential to devastate 210,000 acres of farmland of Stanislaus, Merced and San Joaquin counties important to the food provided to our whole country. Increasing the water exports will certainly lose a larger % of the Valley's water for generations to come effecting my children and grandchildren. I strongly urge you not to increase the water exports out of our fertile valley.
Sincerely, Patricia Cantley*
