Re: *In Re: the Matter of ACL Complaint and Draft CDO against
Scott Fahey and Sugar Pine Spring Water, LLP*

Dear Mr. Tauriainen:

Pursuant to your request for a current list of bottlers that Sugar Pine Spring Water provides water to, the list that was provided to Kathy Mrowka in Mr. Fahey's October 6, 2011 e-mail to Ms. Mrowka, enclosed herewith, is still accurate and complete as stated with the exception of #4-Aquas Water which was purchased by another company.

4) Aquas should be replaced by :

Subject: Re: Permit 21289 for Application 31491 - Item 10 - Point(s) of Use

Scott -

Once you send in the first year's report, I'll be better able to assess this. I think our concern is related to quantities diverted under the rights. I don't think we can track the point of use for a bottled water facility. The bottling plant locations are likely what we need.

Sincerely,

Katherine Mrowka, Chief
Inland Streams Unit
Division of Water Rights

Kathy

Sugar Pine Spring Water is bottled from its permitted sources, i.e. Deadwood and Sugar Pine Springs. In the future the referenced Permit will allow additional sources, i.e. Marco/Polo Spring to be bottled too. The bottlers that are currently bottling Sugar Pine Spring Water are:

- 1) Nestle waters N. A., Inc., 777 W. Putman Ave.; Greenwich, CT; bottling Arrowhead Spring Water in Livermore, CA
- 2) Absopure, P.O. Box 701248; Plymouth, MI; bottling spring water in Modesto, CA under various brand names
- 3) DS Water, 5660 New Northside Dr.; Atlanta, GA; bottling Sierra Spring Water in Milpitas, CA
- 4) Aquas, 947 Emerald Ave.; Modesto, CA; bottling Aquas Spring Water in Modesto, CA.

Additionally, I am annually required to provide the CA Dept. of Health Services, Food & Drug Branch, a list of the bottlers that have bottled Sugar Pine Spring Water during the past year. For licensing purposes I would expect the CA Food & Drug Branch's records will meet the Division's needs for documenting past and future Point(s) of Use. If you have any additional
