Subject: Pit River releases

As I am sure you know, the Pit River releases are a wonderful resource for whitewater enthusiasts, and I just want to be another voice to oppose the proposed cancellation of the recreational releases. More and more we are losing the opportunity to run the world class rivers of California that we and visitors from all over the world are blessed with. Please hear our outcries and reconsider the decision to end the few releases that we do have. We are so lucky in California to have such fun and gorgeous rivers, and we must protect them before they are nothing but stories we tell our Grand children. Thank You.
