Subject: Response per your request

Mr. Coletti,

The District rules often focus on sites. Some sites may have multiple service addresses. Some existing service addresses may serve one or more parcels. Meter splits under footnote 47 of the 2009 CDO would result in multiple new service addresses where there was once just one service address. That is why we don't have a narrow focus on "service address." However, we also track properties by street address and APN (parcel number) and apply the District rules accordingly.

At this time, the District is prepared to end its correspondence on this issue and let public commenters make their inquiries to SWRCB staff.
