

**STATE WATER RESOURCES CONTROL BOARD
AUGUST 16, 2022 – ITEM 8
EXECUTIVE DIRECTOR’S REPORT**

DIVISION OF WATER QUALITY

General Waste Discharge Requirements for Winery Process Water: Since adoption of the Winery Order on January 20, 2021, Division of Water Quality staff is focusing on Regional Water Board and wine industry outreach and collaboration on implementation. Staff is finalizing an electronic Notice of Intent application, an outreach letter, an online eligibility survey for California wine businesses, and guidance materials to assist wineries with the application and enrollment process. These tools provide timely news and information to the wine industry, access to consistent implementation guidance and customer support, and increase workload efficiency for staff enrollment of wineries. Staff mailed the first batch of outreach letters to 117 California wine businesses the first week of August 2022.

Additional resources are available on the [Winery Order Program Webpage](#), Q-Winery@Waterboards.ca.gov.

Underground Storage Tank Regulations – Chapter 16 Rewrite: The proposed underground storage tank regulations amend California Code of Regulations, title 23, division 3, chapter 16 by removing references to single-walled underground storage tanks which require permanent closure by December 31, 2025, per Chapter 6.7 of the Health and Safety Code. Division of Water Quality staff is working with stakeholders and the Regional Boards to refine the regulatory language and will submit the rulemaking package in November 2024. The earliest the State Water Board can adopt the amendments is in June 2025. Proposed regulations are expected to become effective on January 1, 2026.

Cost of Municipal Separate Storm Sewer System Permit Implementation: Division of Water Quality staff continues to work with stakeholders to develop a standardized statewide approach for municipal separate storm sewer system (MS4) permittees to estimate, track, and report costs associated with permit implementation. In June 2022, staff presented at the California Stormwater Quality Association Phase II MS4 Subcommittee meeting to hear feedback from small (population <100,000) permittees. Staff also held discussions with the stormwater managers from Yuba City, City of Monterey, and the Monterey Regional Stormwater Management Program for additional feedback. Staff plans to hold additional outreach events in Fall 2022 that will be focused on a diverse group of traditional and non-traditional Phase II MS4 permittees.

Non-substantive Changes Made to the Toxicity Provisions: On December 1, 2020, the State Water Board adopted Resolution No. 2020-0044 establishing the State Policy for Water Quality Control: Toxicity Provisions (Toxicity Provisions) and authorized the Executive Director to make minor, non-substantive modifications to the language of the Toxicity Provisions if such changes are needed for clarity or consistency and inform the State Water Board of any such changes. The Toxicity Provisions establish numeric acute and chronic water quality objectives for aquatic toxicity; the Test of Significant Toxicity statistical approach for data analysis; effluent limitations for non-storm water National Pollutant Discharge Elimination System (NPDES) discharges; and monitoring requirements for wastewater discharges.

Consistent with authority granted in Resolution No. 2020-0044, the Executive Director made the following minor, non-substantive changes to the Toxicity Provisions to add clarity and consistency:

- In Appendix A of the Toxicity Provisions, amend the definitions of maximum daily effluent limitation (MDEL) and median monthly effluent limitation (MMEL) to add a reference to section IV.B.2.f. of the Toxicity Provisions, so that these definitions reference the sections for both chronic and acute toxicity.
- Delete the placeholder for section “IV.A. *[Reserved]*” from the Toxicity Provisions and renumber subsequent sections.
- Change the following titles: section III from “Water Quality Objectives” to “Aquatic Toxicity Water Quality Objectives;” section IV from “Programs of Implementation” to “Aquatic Toxicity Program of Implementation;” and section IV.B from “Aquatic Toxicity” to “Introduction.”
- In section IV.B.5.a, add the full name of the acronym “CEQA,” which stands for the California Environmental Quality Act, prior to the first use of the acronym.

After incorporating the minor, non-substantive language modifications described above into the Toxicity Provisions, staff also renumbered the sections and references and made other non-substantive revisions to the formatting of the Toxicity Provisions and Staff Report as directed by the State Water Board in paragraph number 13 of Resolution No. 2021-0044.

For additional information on the Toxicity Provisions and the adopting resolution, please see the [Toxicity Provisions web page](#).

Constituents of Emerging Concern (CEC) Science Advisory Panel for Aquatic Ecosystems: The State Water Board and Ocean Protection Council funded a grant to reconvene the Constituents of Emerging Concern (CEC) Science Advisory Panel for Aquatic Ecosystems (Panel) to assess the current state of scientific knowledge on the risks of CECs impacting human health and the environment in freshwater, coastal, and marine ecosystems of the state and update their [2012 recommendations](#). Division of

Water Quality staff in collaboration with the regional water boards and Aquatic Science Center compiled a statewide geospatial CEC dataset with over 450,000 records. The Panel conducted a critical review of the CEC dataset and worked with Division of Water Quality staff to make refinements to improve the quality, utility, and representativeness of the data. The Panel is continuing to work with Division of Water Quality staff to compile, review, and interpret data to inform an updated risk screening approach and an initial prioritization of CEC compounds of interest. The Panel's updated recommendations are anticipated to be released in a report and shared in a public meeting in Fall 2022. For additional information, visit the [Southern California Coastal Water Research Project website](#).

Irrigated Lands Regulatory Program Update: The Irrigated Lands Regulatory reports are included in Appendix A of this report.

Statewide Policies and Significant General Permits: The Statewide Policies and Significant General Permits report can be accessed at the [Statewide and Regional Policies / Significant General Permits website](#).

DIVISION OF WATER RIGHTS

Drought-Related Items

Scott and Shasta Rivers: Below is a summary of highlights associated with the [Drought Emergency Regulation](#) for the Scott River and Shasta River watersheds.

- *Readoption of Regulation.* Amendments to the regulation were submitted to the Office of Administrative Law for review on July 18, 2022 and approved by OAL and filed with the Secretary of State on July 29, 2022 (effective date for updated regulation).
- *Shasta River.* Drought emergency flows during June have been managed pursuant to [Addendum 9](#) to Curtailment Orders [WR 2021-0082-DWR](#) and subsequent curtailment orders issued under the Drought Emergency Regulation for the Shasta River watershed. Per the addendum, the most junior water diverters were directed to immediately cease diversions. The remaining junior water rights holders were directed to work with the Scott Valley and Shasta Valley Watermaster District and State Water Board as appropriate, and if necessary to curtail in order of priority to ensure that the required minimum flows are met at the [Yreka United States Geological Survey \(USGS\) gage](#). The required minimum flow at the Yreka USGS gage in July is 50 cfs and remains 50 cfs through August. This curtailment order remains in effect until otherwise amended. On July 19, 2022, [Order WR 2022-0161-DWR](#) was issued, curtailing an additional water right holder that should have been curtailed by Order WR 2021-0082-DWR. On August 2, 2022, the Deputy Director issued [Order WR 2022-0162-DWR](#),

which conditionally extends curtailments in the Shasta River watershed to a priority date of April 1, 1885.

- *Scott River.* On July 1, 2022, the Deputy Director issued [Addendum 32](#), which curtailed all surface water diversions in the Scott River watershed effective 12:00 p.m. (noon) by July 2, 2022. On July 6, 2022, the Deputy Director issued [Addendum 33](#), which allows holders of first priority water rights from the French Creek Adjudication, the Shackleford Adjudication, and Schedule B of the Scott River Adjudication, may divert up to 15 percent of their first priority water rights (as defined in the respective decree) following notification to the State Water Board as noted in the addendum. On July 8, 2022, the Deputy Director issued [Addendum 34](#), which increased the amount of water that holders of First Priority Water Rights from the French Creek Adjudication, the Shackleford Adjudication, and Schedule B of the Scott River Adjudication, may divert from 15 percent to 30 percent following notification to the State Water Board as noted in the addendum. Addendum 34 included a provision that these first-priority tributary water right diversions must cease immediately if flows drop below the July flow requirement of 50 cfs at the [Fort Jones USGS gage](#). On July 14, 2022, the Deputy Director issued [Addendum 35](#), which curtails all surface water and groundwater rights in the Scott River watershed, except for diversions related to approved exceptions for human health and safety, livestock watering, instream uses, and approved local cooperative solutions. The flow requirement for the Scott River watershed in August is 30 cfs at the Fort Jones USGS gage. Staff continue to monitor forecasts and watershed conditions to determine if further adjustments to curtailments are appropriate.

Staff have also been reviewing local cooperative solutions that have been submitted to the State Water Board and posted on the [Local Cooperative Solutions under Scott-Shasta Drought Emergency Regulation](#) webpage. As of the end of June, there are 10 approved local cooperative solutions.

Additional information on the drought emergency regulation effort is available on the [Scott River and Shasta River Watersheds Drought Response webpage](#) (https://www.waterboards.ca.gov/drought/scott_shasta_rivers/).

Sacramento-San Joaquin Delta Watershed: On July 20, 2022, the State Water Board revised and readopted the [Emergency Curtailment Regulation to Protect Water Supplies in the Sacramento-San Joaquin Delta Watershed](#), which will expire August 19, 2022, without re-adoption. The regulation is to address current and potential future water supply shortages should dry conditions persist. The emergency regulation readopted this year includes minor revisions to streamline administration of the emergency regulation, provide additional flexibility in the implementation of the methodology used to determine water unavailability in the Delta watershed, and clarify existing requirements. Additionally, a new subdivision is included that would protect any water projected to be unused under water rights and claims held by the Sacramento River Settlement Contractors (SRSC) and Feather River Contractors (FRC) due to a

reduction in contractual supplies to the SRSC or FRC resulting from an operations plan for the Central Valley Project (CVP) or State Water Project (SWP).

Additionally, on July 25, 2022, the Board issued a [Notice of Proposed Emergency Rulemaking](#) regarding the Board's July 20 action. On August 2, 2022, the regulation package, consisting of the regulation text, [finding of emergency, informative digest, and fiscal analysis](#), was submitted to the Office of Administrative Law (OAL). After a 10-day OAL review period that includes a five-calendar-day public comment period, OAL may approve the regulation. The regulation would become effective upon filing with the Secretary of State, which is anticipated in mid-August and in advance of expiration of the existing regulation. If approved, the emergency regulation would remain in effect for up to one year but could be repealed if hydrologic conditions improve or re-adopted again if drought conditions persist.

As anticipated, July 2022 brought deepened curtailments in the Delta watershed due to ongoing severe drought conditions. Additional information on the drought emergency regulation, including curtailment status and associated compliance, is available on the [Delta Drought webpage](#).

Permitting and Enforcement Branch

Delta, Hearings, and Special Projects Branch

Revised Draft Biological Goals for Lower San Joaquin River Flow Objectives and Stanislaus, Tuolumne, and Merced Working Group Technical Workshop: On June 24, 2022, staff released, for public comment, the Revised Draft Initial Biological Goals Report for the Lower San Joaquin River. Comments on the draft biological goals are due on August 11, 2022. In addition, staff will hold a public technical workshop to present the Revised Draft Biological Goals for the Lower San Joaquin River on Thursday, August 4, 2022. Biological goals are quantitative metrics to assess progress toward meeting the narrative objectives, inform adaptive implementation decisions, and inform future updates to Bay-Delta Plan. Additional information can be found on the [Bay-Delta Plan Implementation Activities - Lower San Joaquin River Flows](#) webpage.

Notice of Preparation and CEQA Scoping Meeting for the Proposed Regulation to Implement 2018 Bay-Delta Plan Objectives: On July 15, 2022, staff released a Notice of Preparation and California Environmental Quality Act (CEQA) Scoping Meeting for the Proposed Regulation to Implement Lower San Joaquin River Flows (LSJR) and Southern Delta Salinity Objectives in the *Water Quality Control Plan for the San Francisco Bay/Sacramento-San Joaquin Delta* (Bay-Delta Plan). A public scoping workshop is planned for August 10, 2022, to receive public comments, with written comments due by noon on September 9, 2022. Following receipt of public comments staff will review public comments, make any needed changes to the scope of the environmental review, and proceed with CEQA compliance including development of alternatives to be evaluated in a draft environmental impact report. Additional

information can be found on the [San Francisco Bay/Sacramento – San Joaquin Delta Estuary Watershed Efforts](#) webpage.

Water Quality Certification, Public Trust, Cannabis, Data Modernization, Administrative, & Reporting Branch

Phoenix Hydroelectric Project: On June 27, 2022, staff released for public comment, a [draft water quality certification](#) (certification) and draft California Environmental Quality Act (CEQA) document ([initial study/negative declaration](#)) for Pacific Gas and Electric Company's (PG&E's) Phoenix Hydroelectric Project (Project). Comments on the draft certification and CEQA document were due by July 29, 2022. Comments were received from: (1) PG&E (certification and CEQA); (2) Tuolumne County Water Agency (certification); (3) Tuolumne Utilities District (certification); (4) California Department of Transportation (CEQA); (5) Central Sierra Environmental Resource Center (CEQA and certification); (6) United States Forest Service (certification); and (7) California Department of Fish and Wildlife (CEQA).

As background, the Project is located along the South Fork Stanislaus River in Tuolumne County. The Project provides water to Tuolumne Utilities District, generates power, and is required to meet streamflow requirements for the South Fork Stanislaus River. Additional information is available on the State Water Board's [Project webpage](#) (https://www.waterboards.ca.gov/waterrights/water_issues/programs/water_quality_cert/phoenix_ferc1061.html).

Senate Bill 19 – Statewide Stream Gaging Plan: On July 26, 2022, State Water Board staff provided an update on and overview of the Draft Stream Gaging Plan at the Association of California Water Agencies' Water Management Committee Meeting. The Draft Stream Gaging Plan was developed pursuant to [Senate Bill 19](#) (Statute 2019, Chapter 361, Dodd) by the Department of Water Resources and State Water Board, in coordination with the California Department of Fish and Wildlife and Department of Conservation. The Draft Stream Gaging Plan and additional information on the effort is available on the State Water Board's [Senate Bill No. 19 – Stream Gaging Plan webpage](#) (https://www.waterboards.ca.gov/waterrights/water_issues/programs/stream_gaging_plan/).

DIVISION OF FINANCIAL ASSISTANCE

Environmental Review

California Environmental Quality Act (CEQA) Approvals (July 2022)	
CEQA Lead Agency Documents	
Project No.	Entity - Description
1503664	Soledad Mountain Project Water System, Construction of a Water Supply Well - Well PW-06 Project, an Environmental Summary Clearance (ESC), a Notice of Exemption (NOE) and CEQA Determination was prepared on July 14, 2022 and sent to Division of Drinking Water (DDW) District Office to approve and file with the Governor's Office of Planning and Research (OPR).
1910142	Golden State Water Company- San Dimas, Sunflower Well 01 Project, an ESC, an NOE and CEQA Determination was prepared on July 20, 2022, and sent to DDW District Office to approve and file with the OPR.
1910021	Liberty Utilities – Compton/Willowbrook, Well 12C Manganese Sequestration Treatment Project, an ESC, an NOE and CEQA Determination was prepared on July 25, 2022, and sent to DDW District Office to approve and file with the OPR.
Clean Water	
None to report.	
Drinking Water	
None to report.	
Water Supply Permits	
3010101	Santa Margarita Water Agency, Ranch Plan - Water Supply Permit Amendment for the Rienda Reservoirs Project, an ESC, a CEQA Determination and a Notice of Determination on an Environmental Impact Report as the Responsible Agency was prepared on July 14, 2022 and sent to DDW District Office to approve and file with the OPR.

Office of Sustainable Water Solutions (OSWS)

The Draft FY 2022-23 Fund Expenditure Plan (FEP) for the Safe and Affordable Drinking Water (SADW) Fund will be released for a 30-day public comment period on or around August 15, 2022, with a Board Workshop scheduled for August 16, 2022. The FEP discusses: funding approach and targeted distribution of funds (\$130 M from the SADW Fund for FY 2022-23); prioritization of funding for interim solutions and emergencies, technical assistance, administrators, planning, operations and

maintenance, and construction; funding for households served by state small water systems or domestic wells; other related efforts including pilot projects, community engagement, and workforce development; program metrics and performance; funding process and programmatic requirements. The Draft FY-2022-23 FEP will be taken to the Board for consideration of adoption at the November 1, 2022 Board Meeting.

Planning/Construction Project Summary

The tables below summarize the planning and construction agreements and amendments approved in the month of July 2022.

Drinking Water Projects Funded (July 2022)		
Project #	Recipient – Project Purpose	Funding Amount
3110005-009C	Placer County Water Agency (PCWA) - The project will consolidate the Auburn Mobile Home Village (AMHV) water system into the PCWA Bowman/Auburn treated water distribution system by connecting to a nearby, existing PCWA treated water pipeline, and disconnecting the existing well from the AMHV distribution system.	\$424,836

Drinking Water Projects Amended (July 2022)	
Project #	Recipient – Amendment Purpose
1600507-002C	Hardwick Water Company - The purpose of the amendment is to extend the completion date. No funding increase.
5210004-001C	City of Red Bluff - The purpose of the amendment is to incorporate the FBA and a funding increase of \$130,114.

Wastewater Projects Funded (July 2022)		
Project #	Recipient – Project Purpose	Funding Amount
5824-110	Orick Community Services District (CSD) - The Project will investigate the feasibility of providing sewer service to groups of residences of Orick CSD with wastewater cluster systems.	\$500,000
8145-210	City of Newman - Address the City's Primary Sphere of Influence growth and groundwater degradation caused by the reclamation operations. These	\$4,050,000

Wastewater Projects Funded (July 2022)		
	improvements will provide flexibility for the wastewater treatment facility to meet the objectives of its new Order under existing conditions as well as providing some of the capacity required to serve the buildout of the existing city limits.	
8550-110	City of Huron - Conduct a comprehensive sewer collection system improvement project that will assess the condition of the sewer collection system pipelines, correct existing deficiencies, and prioritize the replacement of sewer lines based on their estimated remaining useful life.	\$548,000

Wastewater Projects Amended (July 2022)	
Project #	Recipient – Amendment Purpose
N/A	N/A

Administrator Summary

No administrator agreements were approved in the month of July 2022.

Operation and Maintenance

No Operation and Maintenance Projects were approved in the month of July 2022.

Technical Assistance Summary

The following requests for emergency funding under the Self-Help Enterprises Technical Assistance to Implement the Safe and Affordable Drinking Water Fund project were approved in the month of July 2022.

Work Plan Type	TA Recipient	Water System No.	TA Provider	Emergency Type	Total Amount Approved
Emergency Fund	Stratford PUD	161000	SHE Emergency Fund (SAFER)	Leak Repair	\$20,155.92

Emergency Fund	Teviston CSD	5400641	SHE Emergency Fund (SAFER)	Tank Repair	\$20,098.00
----------------	--------------	---------	-------------------------------	-------------	-------------

No new technical assistance agreements were executed in the month of July 2022.

The table below summarizes the technical assistance work plans approved in the month of July 2022.

Work Plan Type	AR Number	TA Recipient	Project Description	TA Provider*	TA Type	Total Amount Approved
Amendment	5212-D	Daleville (Sewer)	Assist with preparation and submittal of a CWSRF construction application.	SHE Prop. 1	WW	\$408,800 (\$258,400 funding increase)
Amendment	5354-B	Navelencia School	Planning application assistance	SHE Prop. 1	DW	\$16,000 (\$5,400 funding increase)
Amendment	5942-B	City of Tehachapi	CWSRF Construction funding application assistance	SHE Prop. 1	WW	\$24,600 (\$200 funding decrease)
Amendment	6177-C	Plainview Mutual Water Company (Sewer)	Construction application for septic to sewer consolidation.	SHE Prop. 1	WW	\$134,650 (\$21,000 funding increase)
Amendment	6350-B	Sunrise Village Mobile Home Park	Prepare emergency funding application for an emergency intertie and conduct full planning for long term consolidation.	SHE SAFER	DW	\$257,909
Amendment	5772-B	Orosi High School	Assist with execution of an Urgent Drinking Water Needs	SHE Prop. 1	DW	\$13,700 (\$89,200 funding decrease)

Safe and Affordable Funding for Equity and Resilience (SAFER) Summary (includes Safe and Affordable Drinking Water Fund, Proposition 84 Emergency, General Fund, and CAA Urgent Drinking Water Needs funding sources)

SAFER Drinking Water List of All Approved Projects July 2022				
Recipient	Project Purpose	Funding Amount	Funding Program	Category
Self-Help Enterprises	Dry Well Tanks and Hauling Program. The Project provides funding to implement a program to purchase and deliver temporary water storage tanks and hauled potable drinking water to households that have lost their water supply because of dry wells as well as wells failing to meet health and safety needs.	\$32,000,000	General Fund Drought	Tanks and Hauled Water

Funding Provided for Emergency Drought Response

DFA Staff continue to coordinate closely with the Department of Water Resources (DWR) on their drought funding as well as outreach to set up county-level programs to respond to either water shortage or water quality issues for those served by state small water systems and domestic wells. Combined, the State Water Board and DWR are working with 16 counties and continue to coordinate with several other counties on submitting applications.

Cleanup and Abatement Account (CAA)

No updates for the month of July 2022.

Drinking Water for Schools Grant Program

No updates for the month of July 2022.

Budget Act of 2021 Allocations

The following is a summary of significant new allocations from the Budget Act of 2021:

- \$650 million for wastewater infrastructure
- \$650 million for drinking water infrastructure
- \$30-100 million for per- and polyfluoroalkyl substances (PFAS) support for water systems
- \$150-350 million for groundwater cleanup and water recycling projects
- \$20 million for Mexico border rivers

Drinking Water and Wastewater Infrastructure

No updates for the month of July 2022.

PFAS Funding

Additional state funding for PFAS is now available for a total of \$80 million. Funding criteria to be incorporated into FY 2022-23 Drinking Water State Revolving Fund Intended Use Plan (DWSRF IUP) and Safe and Affordable Drinking Water Fund Expenditure Plan (SADW FEP).

Office of Operator Certification

The State Water Board, Office of Operator Certification (OOC) which is comprised of the Drinking Water and Wastewater Operator Certification Program provides support to approximately 40,000 operators and new applicants entering the water industry. Part of the support has been achieved through Computer Based Testing (CBT), which was implemented in February 2021.

An overview of the CBT process and Frequently Asked Questions document is available on the respective OOC websites:

[Drinking Water Treatment & Distribution System Operators | California State Water Resources Control Board](#)

[Wastewater Operator Certification Program | California State Water Resources Control Board](#)

Completed Significant Events

- On July 26, 2022, the OOC held a special joint advisory committee meeting to discuss potential fee increases that will be presented at an upcoming Board meeting.

Future Significant Events

- Both Drinking Water and Wastewater Operator Certification Programs are working with the Division of Information Technology to develop an interactive online application portal for applicants to submit drinking water and wastewater operator applications for examinations, certifications, and certification renewals. The applicants will be able to update, edit, and monitor their applications. This will be a phased approach, starting with lower-level examination applications. Kickoff is set for Wednesday, August 3, 2022.
- On August 17th, representatives of the Office of Operator Certification will be presenting at the California/Nevada (CA/NV) American Water Works Association (AWWA) Water Education Seminar (WES). The presentation will discuss the most recent activities of the Drinking Water Operator Certification Program (DWOCP).

Drinking Water Operator Certification Program (DWOCP)

Distribution DWOCP								
Reporting Period: July 1, 2022 – July 31, 2022								
Applications received (exam, cert, renewals)						3,597		
Certificates issued (new and renewals)						86

DIVISION OF DRINKING WATER

Permits are issued when a public water system undertakes action that may impact public health (i.e. a new source of supply, modifying treatment or adding a large distribution reservoir), when the original permit has numerous amendments, or following new regulations or conditions that DDW deems necessary for the protection of public health.

The following 29 permits were uploaded to ECM between June 26 and July 25, 2022.

Water System	Permit Type	Permit Purpose
CITRUS HEIGHTS WATER DISTRICT	PERMIT AMENDMENTS	CHANGING STATUS OF PALM WELL 1A AND SUNRISE WELL 10 FROM ACTIVE TO STANDBY
CAL AM WATER COMPANY - MONTEREY	PERMIT AMENDMENTS	ADDITION OF ASR WELL 03, ASR OPERATIONAL CHANGES, AND CHANGES TO THE ASR WTP
SANTA MARGARITA WATER DISTRICT	PERMIT AMENDMENTS	RIENDA ZONE 1 RESERVOIRS A & B AND RESERVOIR MANAGEMENT SYSTEM
WOODLAKE, CITY OF	PERMIT AMENDMENTS	WELL 12 NITRATE BLENDING
CAL-WATER SERVICE CO.-MARYSVILLE	PERMIT AMENDMENTS	TEMPORARY PERMIT AUTHORIZING USE OF GAC TREATMENT SYSTEM AT STATION 15
GSWC - CLAREMONT	PERMIT AMENDMENTS	ADDITION OF MOUNTAIN VIEW WELL 5
LAGUNA BEACH COUNTY WD	PERMIT AMENDMENTS	ADDITION OF RESERVOIR MANAGEMENT SYSTEM AT JAHRAUS RESERVOIR
WEBBER LAKE CAMPGROUND	FULL PERMIT	FULL PERMIT

BERKELEY CAMP	PERMIT AMENDMENTS	ALLOWS CITY TO OPERATE THE BERKELEY CAMP WATER SYSTEM
EXETER-IVANHOE CITRUS ASSOCIATION	PERMIT AMENDMENTS	ADDITION OF RO AND UV TREATMENT
BRANGER MUTUAL WATER COMPANY, INC.	FULL PERMIT	REISSUE PERMIT WITH WELL 08 ON STANDBY
EAST ORANGE COUNTY WD - RZ	PERMIT AMENDMENTS	CHANGE OF STATUS FOR ACTIVE WEST WELL TO STANDBY

CITY OF FULLERTON	PERMIT AMENDMENTS	LEAD SAMPLING IN SCHOOLS
-------------------	-------------------	--------------------------

Violations & Enforcement actions

Violations for a water system include whether the system has failed to follow established monitoring and reporting schedules, failed to comply with mandated treatment techniques, violated any Maximum Contaminant Levels, or failed to communicate required information to their customers. Enforcement Actions are used to obtain water system compliance with drinking water requirements to provide a safe and reliable supply of water. The Division of Drinking Water’s formal enforcement actions involve the use of statutory authority and includes issuance of citations and compliance orders.

The following enforcement actions were documented from July 1 and July 31, 2022.

Environmental Laboratory Accreditation Program (ELAP)

Accreditation Activities

ELAP ACCREDITATIONS ISSUED		
	July 2022	Year-to-Date
New Accreditations	2	12
Renewed Accreditations	29	219
Reciprocity Accreditations	6	44
Amended Accreditations	11	97
Total	48	372

ELTAC Subcommittee on Method Selection for Regulatory Testing

ELAP’s advisory committee, ELTAC, created a subcommittee in January of 2021 to develop guidance on how laboratory methods should be developed and what criteria California’s regulatory agencies should consider when selecting laboratory methods to utilize for their regulatory programs. The subcommittee will publish a draft copy to ELAP’s website before the next meeting in 2022.

DDW & DWQ PFAS Strategy Team

ELAP staff continues to regularly participate in the multi-divisional strategy team for regulation of PFAS. ELAP now offers two US EPA methods for analysis of PFAS in drinking water, EPA 537.1 and EPA 533, and continues to offer accreditation to the DoD Quality Systems Manual version 5.1 (or newer). A new US EPA method for “Total Adsorbable Organic Fluorine”, was published recently by the US EPA, and the next meeting will likely discuss potential limitations, uses, and potentially a path to accreditation.

Roadmap to ELAP Accreditation

ELAP continues to support laboratories in transitioning to new regulatory requirements through a compliance assistance initiative, the Roadmap to ELAP Accreditation, including one-on-one Transition Appointments with individual laboratories to answer questions and help them create a plan. Laboratories may request an appointment by emailing ELAP’s general email inbox.

Phase Two of the Roadmap to ELAP Accreditation will focus on increasing laboratory knowledge of regulatory requirements for proficiency testing, on-site assessments, and application requirements.

California Society of Environmental Analysts Meet & Greet Event

ELAP staff participated in a California Society of Environmental Analysts Meet & Greet event on July 28, 2022 to introduce Board Members and the mission of the organization.

National Fraud Awareness Week Kick-off Planning Meetings

ELAP staff are partnering with the Office of Enforcement Fraud, Waste and Abuse Unit to help plan activities to celebrate International Fraud Awareness Week November 13-19, 2022. The planning meetings will cover various events designed to support anti-fraud professionals at the Water Boards and facilitate events that start discussions amongst peers, coworkers, executives, and stakeholders in the environmental protection community about how important fraud prevention is to society as a whole.

The SAFER Clearinghouse Summary Results for July 2022 (on 8/1/2022)

Partnership Outreach Letters

In July 2022, the SAFER Engagement Units sent out approximately 113 letters to public water systems and/or state small water systems inviting them to the workshops and/or recommending that they investigate partnerships and consolidation.

Needs Analysis Unit - Capacity Development Strategy Webinar

On July 7, 2022, the State Water Board's Needs Analysis Unit held a public webinar on updating the Drinking Water Capacity Development Strategy. For more information on the draft strategy, please see the following webpage:

https://www.waterboards.ca.gov/drinking_water/certlic/drinkingwater/docs/2022/2022-capdev-strategy.pdf

Affordability workshops will be occurring on August 11th, September 20th, and November 1st. For more information and registration, please review the following webpage:

https://www.waterboards.ca.gov/drinking_water/certlic/drinkingwater/needs.html

Completed Consolidations Summary

The following water system consolidations were completed during July 2022.

Name	Type	Pop.	County	Notes
Best RV Center	NTNC	61	Stanislaus	nitrate and arsenic contamination, subsequent connection to Keyes CSD Regional Project
Chapala Market Water	NC	29	Riverside	

DIVISION OF ADMINISTRATIVE SERVICES

Update on Water Quality, Water Rights, Drinking Water and Environmental Laboratory Accreditation Program (ELAP) Fees Stakeholder Process

Staff held the third and final stakeholder meetings to discuss FY 2022-23 fees: August 4– Water Quality and Water Rights and August 5 – Drinking Water and ELAP. Staff is scheduled to take proposed FY 2022-23 Drinking Water, Water Quality and Water Rights fee schedule changes to the State Water Board for consideration at the September 20 board meeting.

OFFICE OF ENFORCEMENT

Public Notices:

Public Comment Period begins for Associated Soils Analysis, Inc.

The State Board is currently accepting public comments on the [Proposed Order](#) for Settlement Agreement and Stipulation for Entry of Administrative Civil Liability Order for Associated Soils Analysis, Inc. The proposed order includes an administrative penalty of \$86,651 to be paid to the UST Cleanup Fund. The settlement further stipulates that the settling respondents are disqualified from performing any work for or in connection with any program administered, funded, or directed in any manner by the State Water Board. The public comment period ends on August 29, 2022.

Press Releases:

No enforcement press releases were issued in July 2022.

Administrative Civil Liability (ACL) Complaints Issued:

No ACL Complaints were issued in July 2022.

ACL Orders Issued:

Region	Discharger/City	Violation(s) Addressed	ACL Order Amount	Date Issued
2	Hanson Aggregates/ Sunol	Mandatory Minimum Penalty (MMP) for three exceedances of the average monthly effluent limit (AMEL) for copper	\$368,940 (\$184,470 to Cleanup and Abatement Account (CAA) and \$184,470 to Supplemental Environmental Project (SEP))	7/6/2022

Region	Discharger/City	Violation(s) Addressed	ACL Order Amount	Date Issued
5S	Waterworks Aquatic Management, Inc./ Treelake Village	Failure to submit an adequate monitoring report for the 2020 reporting year.	\$20,000 (All to CAA)	7/15/2022
8	Nuveen Real Estate/ Fontana	Failure to timely respond to an Expedited Payment Letter and failure to submit the 2020-21 Annual Report.	\$4,655 (MMP – all to Waste Discharge Permit Fund (WDPF))	7/27/2022
9	CVS Pharmacy/ La Jolla	Mandatory minimum penalty (MMP) for: <ul style="list-style-type: none"> • Exceedance of the Maximum Daily Effluent Limit (MDEL) for copper • 2 exceedances of the 6-month median effluent limit for copper 	\$9,000 (MMP - all to CAA)	7/29/2022
9	San Diego City Metropolitan Wastewater Dept (Public Utilities)/ San Diego	MMP for exceedance of the instantaneous maximum effluent limit for settleable solids.	\$3,000 (MMP – all to CAA)	7/29/2022
9	Coronado City/ Coronado	MMP for exceedance of the Average Monthly Effluent Limit (AMEL) for settleable solids.	\$3,000 (MMP – all to CAA)	7/29/2022

Investigative Orders

Region	Discharger/City	Violations Addressed/Action(s) Required	Date Issued
2	Pilot Thomas Logistics L.L.C./ San Francisco	Requires Pilot Thomas and the Port of San Francisco (Port) to submit a Remedial Action Plan (RAP) to abate the impacts to soil, groundwater, surface water, and sediment caused by the discharge of R-99 diesel fuel at Hyde Street Harbor, located at 482 Jefferson Street in San Francisco.	7/13/2022
2	Spaulding Enterprises/ Mill Valley	Requires the submittal of the final July sampling results report, a work plan for additional cleanup or modification of the existing vapor intrusion mitigation system (VIMS), and a vapor intrusion communication plan for the	7/22/2022

		Former York Cleaners, located at 31 Miller Avenue in Mill Valley.	
3	Equilon Enterprises LLC DBA Shell Oil Products US/ Salinas	Requires the submittal of a well destruction report summarizing filed activities to GeoTracker by September 15, 2022, for Shell Service Station, located at 1764 North Main Street in Salinas.	7/1/2022

OFFICE OF INFORMATION MANAGEMENT AND ANALYSIS

The California Aquatic Bioassessment Workgroup and the California Chapter of the Society of Freshwater Science are collaborating on their annual meetings. The purpose of this joint meeting is to exchange current and relevant bioassessment and freshwater science information among professionals, resource managers, policymakers, educators, students and the public; network and build partnerships; and, to support science-based policy and natural resource management to protect and restore California’s freshwater aquatic ecosystems.

The meeting will be on October 11 and 12 in-person in Sacramento. It will also be webcast. See the meeting’s [Eventbrite](#) page for details and registration.

OFFICE OF RESEARCH, PLANNING, AND PERFORMANCE

Water Conservation

The response rate for the June 2022 Urban Water Conservation Report is 90% as of the writing of this report (369 reports submitted). Of the submitted reports, 36 were preliminary “short” reports and 333 were full reports. The estimated total production (accounting for missing reports) is 175 billion gallons, and the statewide R-GPCD is 101 GPCD. 267 agencies report that they have evoked the state standard level 2 or higher of their water shortage contingency plan.

We received 2,439 water waste reports through the [Save Water](#) site.

Updated Water Conservation Emergency Regulations webpage and FAQ: <https://bit.ly/conservationreg>

COVID-19

The water shutoff reporting site received 14 reports for the month of July 2022.

Climate Change

Completed State Water Board evaluations of CalRecycle’s [Co-digestion Grant Program \(First Cycle\)](#) application process. Continuing to work with CNRA and CARB on the [AB 32 Climate Change Scoping Plan Update](#). Began participation in CalOES workgroup to update the State Hazard Mitigation Plan’s Climate Section and engagement with the

OFFICE OF CHIEF COUNSEL

Water Quality Petitions Currently Under Consideration for Review by the State Water Board (as of August 1, 2022)

The State Water Board is considering whether to grant review of the following current active petitions for review of regional water quality control board actions or failures to act in accordance with Water Code section 13320. These petitions for review will be dismissed by operation of law if (1) the State Water Board does not issue a letter granting review or (2) the State Water Board does not receive a written request from the petitioner that the petition be held in abeyance, prior to 5:00 p.m. on the corresponding deadline. Any exhibits identified in the petitions are available upon request by emailing waterqualitypetitions@waterboards.ca.gov.

IRRIGATED LANDS REGULATORY PROGRAM UPDATE

July 2022

This month's Irrigated Lands Regulatory Program (ILRP) update provides a summary of significant activities of State Water Resources Control Board (State Water Board) from June 15, 2022 to July 15, 2022. This update also covers the Central Valley Regional Water Quality Control Board's (Regional Water Board) compliance and outreach activities from May 1, 2022 to June 30, 2022. Next month's report will present activities of the North Coast, San Francisco Bay, Central Coast, Los Angeles, Lahontan, Colorado River Basin, Santa Ana and San Diego Regional Water Boards' Programs and cover the time period from June 15, 2022 to August 15, 2022.

State Water Board staff met on June 29, 2022 to review a draft notice of termination (NOT) form for the program to use in the GeoTracker database to streamline the termination process for those no longer needing to be enrolled in the program. The online form is expected to be implemented in 2023.

Many staff from the program statewide also participated in a two-day training on July 12 and 13, 2022 to better understand fate and transport of agrochemicals.

Central Valley Water Board staff prepared the following table to summarize Region 5's Irrigated Lands compliance and outreach activities. More information can be found in the Central Valley Water Board's [Executive Officer's Reports website](#).

For the table below, March 7, 2022 is start date for first three items. The numbers provided for all items are as of April 30, 2022.

Reminder Letter for Late Report (INMSR) are letters sent to members to submit their annual Irrigation Nitrogen Management Plan Summary Report (INMPSR).
Directive Letters (13260) are letters sent to owners of parcels who have potential commercial irrigated lands directing them to enroll in the ILRP as required under California Water Code, section 13260.

Drinking Water Well Samples are the number of drinking water well samples collected and reported in GeoTracker.

Notifications Required are the number of members required to notify users and Central Valley Water Board that their drinking water well samples exceeded the drinking water standard.

Notifications Received are the number of notification responses received from members whose drinking water well sample results exceeded the nitrate drinking water standard.

Indicated Replacement Water Provided is the number of notification responses the Central Valley Water Board received indicating replacement water is provided.

Reminder Letters for Late Report (INMPSR)	206
Directive Letters (13260)	6
Drinking Water Well Samples	13,734
Notifications Required	3,342
Notifications Received	3,317
Indicated Replacement Water Provided	815

Central Valley Water Board staff holds regular ILRP stakeholder meetings to provide an open forum for communication between staff, agricultural coalitions, environmental justice groups, and other interested parties in Central Valley Region. The July 20th meeting continues to focus on development of the Groundwater Protection Targets. Other meetings have been held with the agricultural coalitions, environmental justice representatives, and other stakeholders to discuss development of the Targets.

In September 2021, ILRP staff invited laboratories to submit validation packages for analytical methods to achieve a lower, more environmentally meaningful minimum reporting level for imidacloprid. Staff also coordinated with State Water Board’s Quality Assurance Officer and the Environmental Laboratory Accreditation Program to advance accreditation of laboratories that developed acceptable analytical methods. Accreditation was issued to three laboratories in May 2022. Agricultural coalitions are required to begin using the new accredited method for imidacloprid in 2023.

Additional program information can be found at the [Central Valley Regional Board ILRP website](#).
