**Subject:** STATE WATER PLAN

TO: STATE WATER BOARD OF CALIFORNIA

Regarding the state water plan to divert 40% of water would be devastating to our farming operation here in Modesto area. My family has been farming in the Modesto area for over 100 years in diversified farming, and my Sons who are now involved, and my grandsons will be involved in the future of our family farm. I ask you to consider our plight, and the sustainability of our family farming operation, please don't take away our lively hood. There are over 20 employees that are depending on our operation and my family to make a living. I feel like our water rights are being taken away.

Sincerely,

Gordon Heinrich
