

Jessica,

Just wanted to provide a couple of comments on the proposed water regulations. I think it would be helpful to provide examples of common offenses and what they may look like (with perhaps pictures), especially the urban water use violations (landscape irrigation do's and don'ts). Additionally, since these will be mandated actions, with penalties, you might mention how to report violations and to whom. I know that in many municipalities, this would involve notifying your local public works department who would then issue a warning or citation. I like where these goals are headed, but just want to make their understanding and enforcement as transparent a process as possible.
