

LA DWP spews TWENTY MILLION gallons of water onto the UCLA campus.

You environmental kooks spew 4.3 BILLION gallons of water into the ocean to save SIX FISH (not six SPECIES of fish. SIX FISH!). (This amount of water would supply my family for 175,000 YEARS!!)

Almond farmers suck up 10% of the water for less than 1% of California's economy to ship a LUXURY product to Asia.

But you are going to send the water police into my shower to chastise me if I shower for 5 minutes instead of 3.2. (Reduce MY water usage by 36%???)

Does all this sound absurd and moronic? That's because IT IS!

You government hacks are absolutely disgusting and your decision making is atrocious.

Please resign in disgrace and hire someone who has the tiniest bit of COMMON SENSE
