

State Water Resources Control Board

NOTICE OF PETITIONS FOR TEMPORARY URGENCY CHANGE FOR LICENSES 10191 AND 10192 (APPLICATIONS 8042 AND 8043) OF THE CITY OF LOS ANGELES, DEPARTMENT OF WATER AND POWER

COUNTY: MONO STREAM SYSTEM: RUSH CREEK

On May 7, 2024, the State Water Resources Control Board (State Water Board) received Temporary Urgency Change Petitions (TUCPs) pursuant to California Water Code section 1435 from the City of Los Angeles Department of Water and Power (LADWP) requesting approval of temporary changes to water right Licenses 10191 and 10192 (Applications 8042 and 8043). With the TUCPs, LADWP requests authorization to temporarily change existing water right terms and conditions from June 17, 2024, to July 23, 2024. Currently, the 2024 runoff year is forecasted to be a Normal Year type for the purpose of determining Rush Creek Stream Ecosystem Flows (SEF). A Normal Year will require a Snowmelt Peak flow of 380 cubic feet per second (cfs) for 3 days between June 23 and July 3. Peak flow releases cannot be met by the existing outlet valve due to mechanical issues. Summertime releases will therefore be adjusted by following the Amended Licenses 10191 and 10192 provisions for adaptive management and in consultation with the Stream Monitoring Team. The Runoff Year may develop into a Wet/Normal year which requires a Snowmelt Peak flow of 550 cfs between June 19 and July 23. Should this occur, the same operational adjustments will be made based on the Table 1C SEF table of the Amended Licenses.

Malfunction of the Grant Lake Outlet valve is leading to cavitation in an unsafe manner above 175 cfs, which cannot be remediated prior to the requested change date. To avoid failure, the outlet valve's flow is limited to 175 cfs while replacement work is planned and implemented.

Summary of Existing Licenses 10191 and 10192

Sources:	(1) Lee Vining Creek, (2) Walker Creek, (3) Parker Creek, (4) Rush Creek
Points of Diversion:	 (1) NE¼ of NW¼ of Section 20, T1N, R26E; (2) NW¼ of NW¼ of Section 4, T1S, R26E; (3) SW¼ of NW¼ of Section 9, T1S, R26E; (4) NW¼ of NW¼ of Section 15, T1S, R26E, all within MDB&M

E. JOAQUIN ESQUIVEL, CHAIR | ERIC OPPENHEIMER, EXECUTIVE DIRECTOR

Points of Rediversion:	Grant Lake - SW¼ of NW¼ of Section 15, T1S, R26E; Long Valley Reservoir - SE¼ of NW¼ of Section 19, T4S, R30E; Tinemaha Reservoir - NE¼ of NW¼ of Section 26, T10S, R34E; Los Angeles Aqueduct Intake - NE¼ of SW¼, T11S, R34E; and Haiwee Reservoir - SW¼ of NE¼ of Section 2, T21S, R37E, all within MDB&M
Amount:	16,000 acre-feet per annum
Season:	January 1 through December 31
Purposes of Use:	Municipal and Power
Place of Use:	Within the service area of the Department of Water and Power, City of Los Angeles, as shown on map filed with the State Water Board.

Pursuant to California Water Code section 1438(a), the State Water Board may issue a temporary change order in advance of public notice.

Pursuant to California Water Code section 1438(d), any interested person may file an objection to the TUCPs. The procedure for addressing an objection is described in Water Code section 1438. Objections filed in response to this notice should be submitted to the persons listed below and must be received by **4:30 p.m.** on **May 24, 2024.**

Send objections to **both**:
