November 26, 2012

### NOTICE OF PUBLIC HEARING

#### To Consider Adoption of a Total Maximum Daily Load for Diazinon and Additive Toxicity with Chlorpyrifos in the Arroyo Paredon Watershed, Santa Barbara County

The California Regional Water Quality Control Board Central Coast Region (Central Coast Water Board) will hold a public hearing to consider approval of a resolution to adopt a Total Maximum Daily Load (TMDL) for Diazinon and Additive Toxicity with Chlorpyrifos in the Arroyo Paredon Watershed (Resolution R3-2013-0004).

The purpose of the TMDL is to protect waters within the Arroyo Paredon Watershed from water quality degradation due to elevated levels of diazinon. The resolution proposes numeric targets to protect beneficial uses, assigns allocations to achieve the numeric targets, and outlines an implementation and monitoring plan to gauge the success of achieving the TMDL. Components of the TMDLs are written in the Project Report.

The draft documents include the Staff Report, Resolution, and Project Report and will be available by November 26, 2012 on the Regional Board's Internet site at:
