Hi Drew,

Thanks for the map. We've got a few questions about the map, as well as questions about the Brown and Caldwell runoff calculations. We'd like to have a short conference call with your consultants, and are hoping they might be available on Wed or Thur of this week.

thanks

Wendy Wyels

August 1, 2014

Hello Wendy et al.:

As requested, attached is a copy of an update to the Figure 1 in our July 30th report on FRO which more clearly delineates the permitted footprint of the facility and the compost operations area.

Please feel free to call me with any questions.

Drew

Hi Drew,

We've started to review the document, and just have one question. We'd like to see a map of the property that outlines the 15.8 acres of the permitted footprint versus the 11.4 acre of the actual area used for the composting operation.

Thanks

Wendy

July 30, 2014

Hello Wendy – this responds to your July 15, 2014 letter regarding the Feather River Organics (FRO) composting facility.

In sum, it requests Regional Board approval of a plan for a system to collect and manage stormwater runoff from FRO for a 25 year/24 hour storm.

If a meeting to discuss this compost area leachate collection system upgrade will expedite your review and approval process, we would welcome the opportunity to meet at your offices.

Thank you for your time and consideration.

Drew
