Thanks Catherine---

We are on track for getting you all revisions discussed yesterday in your emails and on the phone, plus the new attachment 10 concerning the change in entrainment minimization technology, plus the 3 redlines hat Phil requested, by 2 pm today.

Chris

Hi Chris,
That looks to me like what we discussed.
Catherine

Phil and Catherine

I believe this is the edit we discussed on the phone at 1 pm today regarding the performance of the mitigation site, in terms of production of fish biomass to compensate for impingement impacts.

Does this look like what we discussed?

Chris

EDIT ON PAGE 6-2, SECTION 6.2.1

The precise habitat composition of the mitigation site(s) will be determined and vetted at the design stage of the mitigation planning, and the proppsed mitigation site will be reviewed to confirm that it will provide no less than 1715.5 kg per year of fish biomass productivity. ~~where both the Regional Board and the Coastal Commission will have the opportunity to pass on the site(s)' restoration plan.~~ Thus, the MLMP assures that the Project will result in a net productivity of fish biomass.
